**Reconsidered** Joseph Bankard, 2014-10-17 Like many contemporary issues moral discourse finds itself in the middle of a great divide On one side of the chasm sits much of contemporary Western philosophy moral psychology and the social sciences which often view morality as a purely natural phenomenon This view argues that human morality can be fully explained by appealing to naturalistic processes such as kin selection reciprocal altruism cultural evolution and various models of social contract theory In this context God's existence is a problem **Reading Richard Dawkins** Gary Keogh, 2014 Theological reactions to the rise of the new atheist movement have largely been critically hostile or defensively deployed apologetics to shore up the faith against attack Gary Keogh contends that focusing on scholarly material that is inherently agreeable to theology will not suffice in the context of modern academia Theology needs to test its boundaries and venture into dialogue with those with antithetical positions Engaging Richard Dawkins as the embodiment of such a position illustrates how such dialogue may offer new perspectives on classical theological problems such as the relationship of science and religion the existence of God creation natural suffering and theodicy Keogh demonstrates how a dialogical paradigm may take shape rather than merely discussing it as a theoretical framework A dialogue between such opposing hermeneutics may provide a new paradigm of theological scholarship one which is up to the task of facing its critics in the public and pluralistic context of
