*Macroscopic Electrodynamics Instructor's Solutions Guide* Walter Wilcox, Chris Thron,2016 This instructor's solutions guide is produced for our graduate electrodynamics textbook *Macroscopic Electrodynamics* Notice the use of the word guide rather than manual We believe a step by step solutions manual is not suitable for this advanced level text A detailed solutions manual would be unwieldy given that there are about 300 substantial problems in the text We do not think university level instructors require such a step by step manual and should be free to attempt their own innovative solutions In the guide we will suggest basic approaches and helpful starting points as well as give some crucial intermediate steps and the final result but we will leave it up to the instructors to fully complete the solutions Thus web plagiarism will be more difficult to commit and more easily identifiable and this will extend the useful life of the text      *Numerical Methods for Physics, Second Edition* Alejandro L.
