

**Fig-
1**

The inner drum drive shaft is mounted in the outer drum with two ball bearings at the back plate. Two neoprene gaskets make the shaft leak resistant.

The motor is mounted on a rubber-cushioned shaft under the drum.

To prevent transmission of troublesome noises from chassis to the building frame, the motor's belt-tensioning device is also rubber-cushioned.

The drain valve is a membrane valve controlled with the help of the water pressure in the cold water connection.

The door is electrically locked when the machine is running.

Timer, level control, thermostat, motor relays, etc., are located in the automatic control unit which is easily accessible from the top of the machine.

The front plate is available in a selection of finishes (galvanised/ painted or in stainless steel). The side plates are galvanised/ painted, the rear panel is galvanised/unpainted and the top panel is stainless steel.
