Electrophysiological Maneuvers For Arrhythmia Analysis:

Electrophysiological Maneuvers for Arrhythmia Analysis George J. Klein MD, Lorne J. Gula MD, Peter Leong-Sit MD, Jaimie Manlucu MD, Paul D. Purves BSc, Allan C. Skanes MD, Raymond Yee MD, 2014-05-01 From senior electrophysiologist and world class educator George Klein a fully illustrated guide with over 100 intracardiac tracings and figures that allow the physician to approach electrophysiologic problems effectively and systematically The book is especially focused on electrophysiological maneuvers and provides a clear and understandable guide to their proper selection and interpretation using abundant clinical examples Defines the integral role for traditional electrogram EGM analysis in order to understand the mechanism of a tachycardia It goes without saying that a correct arrhythmia diagnosis is a prerequisite to catheter ablation regardless of the presence of sophisticated mapping and imaging technologies Electrophysiological maneuvers are fundamental to this process and proper selection and interpretation of maneuvers constitute a core skill of the electrophysiologist In this volume we make the case that most maneuvers are fundamentally similar in principle and can be understood by appreciating a few basic physiological and anatomical principles The art lies not in a comprehensive knowledge by rote of every maneuver or its application but rather a systematic approach using common principles We illustrate this by showing abundant examples and emphasizing the game plan including checklists that can be applied to virtually any maneuver George J Klein In my opinion this book should be on the shelf of every electrophysiologist trainee as well as every clinical cardiac electrophysiologist It is a classic like its editor Dr Klein deserves high praise for organizing his and his colleagues clinical experiences and thought processes into a concise practical text that should be part of all training programs in electrophysiology From the foreword by Mark E Josephson MD
