**Evaluation Methodology Basics** E. Jane Davidson, 2005 Click Additional Materials for downloadable samples I welcome this student friendly text to complement my favorite checklists This text develops the core checklist framework to provide evaluation methodology basics for presumably mainly introductory courses on program evaluation Colin Sharp Evaluation Journal of Australasia What is evaluation specific logic and methodology This book answers that question in a way that is persuasive accessible and understandable It presents a set of principles and procedures to guide the task of blending descriptive data with relevant values to draw explicitly evaluative conclusions The book makes a significant contribution to positioning evaluation as a unique and special field of inquiry and judgment Michael Quinn Patton Union Institute and University Amidst the wash of methods books available to evaluators Davidson s book provides powerful techniques for asking and answering the important foundational questions in any program evaluation Doug Leigh Pepperdine University This is a very well written book that offers a unique perspective on long practiced evaluation techniques and presents several new potentially very useful techniques that return valuation to the evaluation process Greg Roberts University of Texas Austin Evaluation theorists for years have advised evaluators to take into account all relevant values as part of an evaluation But especially for the relatively new evaluator even one who is knowledgeable and experienced in research methodology there is not a lot of guidance about how this is done Evaluation Methodology Basics The Nuts and Bolts of Sound Evaluation provides a step by step guide for doing a real evaluation It focuses on the main kinds of big picture questions that evaluators usually need to answer and how the nature of such questions is linked to evaluation methodology choices Jane Davidson explains how to combine a mix of qualitative and quantitative data with relevant values such as needs to draw explicitly evaluative conclusions Many students and evaluators find it difficult to visualize what evaluation logic and methodology look like in practice To address this Davidson presents readers with useful rubrics and flowcharts that may be used during each stage of the evaluation Many of the concepts presented in the chapters are illustrated with specific examples from a range of disciplines Exercises and pop quiz questions help reinforce the key points covered in each chapter provide homework assignments for those teaching an evaluation course and allow learners to develop slices of an evaluation plan as they work their way through the text Evaluation Methodology Basics is an ideal text for students of evaluation and students in programs that have evaluation course requirements such as education health sociology psychology and many others throughout the social sciences It will also be essential reading for practitioners who find themselves thrown into evaluation roles without the benefit of specialized evaluation training

Evaluation Essentials Evaluation Essentials is an indispensable text that offers an introduction to program evaluation Examples of program descriptions from a variety of sectors including public policy public health non profit management social work arts management education international assistance and labor illustrate the book s step by step approach to the process and methods of program evaluation Perfect for students as well as new evaluators Evaluation Essentials offers a comprehensive foundation in the core concepts theories and methods of program evaluation *Evaluation Methodology for Training - Theory and Practice* Om Prakash Bhatnagar,1987 **Realistic Evaluation** Ray Pawson,Nicholas

Tilley,1997-04-23 Realistic Evaluation shows how program evaluation needs to be and can be bettered It presents a profound yet highly readable critique of current evaluation practice and goes on to introduce a manifesto and handbook for a fresh approach The main body of this book is devoted to the articulation of a new evaluation paradigm which promises greater validity and utility from the findings of evaluation studies The authors call this new approach realistic evaluation The name reflects the paradigm s foundation in scientific realist philosophy its commitment to the idea that programmes deal with real problems rather than mere social constructions and its primary intention which is to inform realistic developments in policy making that benefit programme participants and the public Ray Pawson and Nicholas Tilley argue with passion that scientific evaluation requires a careful blend of theory and method quality and quantity ambition and realism The book offers a complete blueprint for evaluation activities running from design to data collection and analysis to the cumulation of findings across programmes and onto the realization of research into policy The argument is developed using practical examples throughout and is grounded in the major fields of programme evaluation This book will be essential reading for all those involved in the evaluation process especially those researchers students and practitioners in the core disciplines of sociology social policy criminology health and education This book is a must for those engaged in the field providing a fully illustrated text on evaluation with numerous examples from the criminal justice system Unusually it offers something for the academic practitioner and student alike I found Pawson and Tilley s latest work on evaluation an enjoyable and informative read For myself their realistic evaluation clarified and formalised a jumbled set of ideas I had already been developing Although not everyone will agree with the methodology proposed by the authors this book is a valuable read as it will cause most of us at least to review our methodological stance International Journal of Police Science and Management This is an engaging book with a strong sense of voice and communicative task The voice is sometimes strident but always clear Its communicative qualities are evident equally in its structure lots of signposting for the reader within and across chapters Language Teaching

Research This provocative elegant and highly insightful book focuses on the effective incorporation of actual practice into the formulation of evaluation methodology What a pleasure to read sentences like The research act involves learning a stakeholder s theories formalizing them and teaching them back to that informant who is then in a position to comment upon clarify and further refine the key ideas Pawson and Tilley have given us a wise witty and persuasive account of how real practitioner experience might be encouraged to intrude on and modify researchers concepts about program processes and outcomes This holds important promise for achieving something that is devoutly to be wished closer interaction among at least some researchers and some policy makers Eleanor Chelimsky Past President of the American Evaluation Association This is a sustained methodological argument by two wordly wise social scientists Unashamedly intellectual theoretically ambitious yet with a clear but bounded conception of evaluation It is articulate occasionally eloquent and always iconoclastic whilst eschewing paradigm wars The Pawson and Tilley realist call to arms threatens to take no prisoners among experimentalists constructivists or pluralists It is the kind of book that clarifies your thoughts even when you disagree with everything they say Elliot Stern The Tavistock Institute      Systematic Evaluation ,198?      **Evaluation Research Methods: a Basic Guide** Leonard Rutman,1977      Educational Evaluation Methodology ,1981
