Manual of Standardization in the Romance Languages Franz Lebsanft, Felix Tacke, 2020-01-20 Language standardization is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric in the Prague School in the linguistic theory of Eugenio Coseriu in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian, Italian, French, Catalan, Spanish and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of the minor Romance languages as well as Creoles. *Manual of Applied Romance Linguistics* Vera Mathieu, Julia Montemayor Gracia, Claudia Polzin-Haumann, 2025-06-16 This handbook provides a systematic overview, firstly of the basic concepts and secondly of current research topics and trends in Applied Romance Linguistics from a theoretical, methodological and empirical perspective. It takes account of both traditional and innovative research approaches. Following a general introduction to the field and its major topics, methods and objectives, the presentation is divided into four thematic sections: methods and methodology, language society and knowledge, language acquisition and language education, specialised communication and transfer. The volume is geared towards researchers, teachers and students working in the fields of linguistic and communication studies but also addresses the general public. It aims to provide useful information for anyone dealing with problems of language and communication in their professional or private lives and illustrates career options for graduates of Romance Linguistics.

Error Analysis Bernd Spillner, 1991 Errors are information. In contrastive linguistics they are thought to be caused by unconscious transfer of mother tongue structures to the system of the target language and give information about both systems. In the interlanguage hypothesis of second language acquisition errors are indicative of the different intermediate learning levels and are useful pedagogical feedback. In both cases error analysis is an essential methodological tool for diagnosis and evaluation of the language acquisition process. Errors too give information in psychoanalysis, e.g. the Freudian slip in language, universal research and in other fields of linguistics such as linguistic change.

This bibliography is intended to stimulate study into cross language cross discipline and cross theoretical as well as for language universal use of the numerous but sometimes hard to come by error analysis studies 5398 titles covering the period 1578 up to 1990 with work in more than 144 languages and language families are cited cross referenced and described The subject areas covered are numerous For example Theoretical Linguistics Linguistic Typology Cognitive Linguistics Historical Linguistics Language Change Applied Linguistics e g Speech Disorders Translation Mother Tongue Acquisition Foreign Language Learning Negative Transfer Intralingual and Interlingual Errors Psychoanalysis Slips of the Tongue Typography Shorthand Clinical Linguistics and Speech Pathology Reading Research Automatic Error Detection Contact Linguistics Code switching Interference etc The Oxford Handbook of the French Language Wendy Ayres-Bennett, Mairi
