Overview of Cyber-Technology in a Digitally Connected Global Society Joseph O. Esin, 2017-01-16 The author acknowledges the links between education technology network operating systems data and information transmission and communications cybertechnology culture of education instruction and learning In essence recognizing the correlation among the education and the world of codified technology this book will assist in providing a deeper understanding and greater improvement of instructional methods and strategies In addition this book will provide a correlation between education and technology as a promising and systematic approach for moving away from or conventional methods of classroom instruction and learning endeavors The readers in essence will see the integration of education and cybertechnology as a pinnacle of educational reform for current and future generations Furthermore the contents of this book also help expound the benefits and the broad range of possibilities that technology can offer in education instruction and the learning process The proliferation of the uncertain telegraph and mechanized printing machines changed the quality of human writing We can also expect the use of a well synthesized educational technology textbook for instruction and learning to lead to the same startling

changes in human society It is the authors view that the anticipated changes should not assume any deficiency on the part of the professors instructors and allied educators Rather it should ascertain that educators need to be proficient in the use of technology to manage and deliver instruction in different subject areas such as computer information technology network technology wired and wireless technology and cyber security threats The author firmly believes that current and future learners are essentially the conglomeration of unfurnished learner materials that are ready and willing to be furnished by the educational system
