## **First Phase Reforms Local Government Burdens:**

It's Time for a Change Matthew Lynch, 2012 China Japan and South Korea understand that well educated workers are crucial for survival in the competitive global economy Thus they are placing enormous emphasis on education ensuring that their students receive instruction not only foundational reading and math but are also taught to think creatively and solve problems Their youth are poised to take on and conquer the world The U S on the other hand is losing the battle School systems are using more money but have less to show for it Test results especially among the lower socioeconomic classes are dismal America has extraordinary natural resources a solid functioning democracy and excellent infrastructure but unless we can reform our educational system to produce students who are able to take advantage of new technologies and compete in the global economy we will cede our position as world leader Its Time for Change School Reform provides a no nonsense blueprint for reforming The U S

Where FDI Goes in Decentralized Authoritarian Countries Kelan Lu, 2023-05-02 Among all the decentralized authoritarian countries China is distinctive not only because of its emergence as one of the largest foreign direct investment FDI recipient countries with one of the highest levels of fiscal decentralization but also because of the combination of its fiscal decentralization and the cadre promotion system as incentive institutions for attracting FDI inflows China is an important case to empirically investigate the impact of fiscal autonomy on adversarial investment because it has become the largest investment destination of its long term adversary Taiwan with Taiwanese FDI being among the largest FDI in mainland China Given the special role played by local Chinese governments in attracting and hosting Taiwanese FDI it is important to study

the differences between where Taiwanese FDI and other FDI goes Given the uniqueness of the China case and that of Taiwanese investment in mainland China this book explores the following questions What determines where FDI goes in authoritarian countries like China Fiscal decentralization has been argued to be a driving force of skyrocketing FDI inflows in China due to its impact on local governments incentives However is the impact of fiscal autonomy on FDI monolithic with the dynamically changing levels of FDI inflows at the lower administrative levels in China especially with its special cadre management system Does the impact of fiscal decentralization on FDI strengthen or weaken or stay the same when attracting FDI inflows from adversarial states And what are the implications of such adversarial investment especially as it diffuses from coastal cities to the interior regions or from key cities to peripheral regions of decentralized authoritarian countries targeted by this investment

**The Politics of Rural Reform in China** Christian Göbel, 2010-06-10 Based on a treasure trove of information collected through fieldwork interviews and painstaking documentary research through the Chinese and Western language presses this book analyzes one of the most important reforms implemented in China over the past decade the rural tax and fee reform also known as the Third Revolution in the Countryside The aim of the tax was to improve social stability in rural China which has become increasingly shaken by peasant protests many of them large scale and violent By examining the gap between the intentions of the reform and the eventual outcomes Göbel provides new insights into the nature of intergovernmental relations in China and highlights the ways in which the relationship between the state and the rural populace has fundamentally changed forever The Politics of Rural Reform in China will appeal to students and scholars of Chinese politics governance and development studies

**Index to Volume VI. Part 73. July 15, 1875** The Sanitary Record, 1885

Globalization and Public Sector Reform in China Kjeld Erik Brødsgaard, 2014-04-24 This book analyses public sector reform comprehensively in all parts of China's public sector government bureaucracy public service units and state owned enterprises It argues that reform of the public sector has become an issue of great concern to the Chinese leaders who realize that efficient public administration is key to securing the regime's governing capacity and its future survival The book shows how thinking about public sector reform has shifted in recent decades from a quantitative emphasis on small government which involved the reduction in size of what was perceived as a bloated bureaucracy to an emphasis on the quality of governance which may result in an increase in public sector personnel The book shows how although Western ideas about public sector reform have had an impact Chinese government continues to be best characterized as state capitalism with the large state owned enterprises continuing to play an important and increasing role in the economy and in business However state owned enterprises no longer provide care for large numbers of people from the cradle to the grave finding an alternative efficient way of delivering basic welfare and health care is the big challenge facing China's public sector
