**Disrupting Class, Expanded Edition: How Disruptive Innovation Will Change the Way the World Learns** Clayton M. Christensen, Curtis W. Johnson, Michael B. Horn, 2010-09-17 Clay Christensen's groundbreaking bestselling work in education now updated and expanded including a new chapter on Christensen's seminal Jobs to Be Done theory applied to education Provocatively titled Disrupting Class is just what America's K 12 education system needs a well thought through proposal for using technology to better serve students and bring our schools into the 21st Century Unlike so many education reforms this is not small bore stuff For that reason alone it's likely to be resisted by defenders of the status quo even though it's necessary and right for our kids We owe it to them to make sure this book isn't merely a terrific read it must become a blueprint for educational transformation Joel Klein Chancellor of the New York City Department of Education A brilliant teacher Christensen brings clarity to a muddled and chaotic world of education Jim Collins bestselling author of Good to Great Just as iTunes revolutionized the music industry technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education Disrupting Class is a must read as it shows us how we can blaze that trail toward transformation Jeb Bush former Governor of Florida According to

recent studies in neuroscience the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive academically, economically, and technologically, we need to rethink our understanding of intelligence, reevaluate our educational system, and reinvigorate our commitment to learning. In other words, we need disruptive innovation. Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time: education, and apply Christensen's now famous theories of disruptive change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how customized learning will help many more students succeed in school. Student-centric classrooms will increase the demand for new technology. Computers must be disruptively deployed to every student. Disruptive innovation can circumvent roadblocks that have prevented other attempts at school reform. We can compete in the global classroom and get ahead in the global market. Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, *Disrupting Class* will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.

Strategy & Business, 2007      The New Learning Commons where Learners Win!

David V. Loertscher, Carol Koechlin, Sandi Zwaan, 2008 Examines the function and role of school libraries and computer labs. Considers how these resources are used differently than intended because they have been organization-based rather than client-based.

**Academy of Management Annual Meeting** Academy of Management, 2007      *Howard Gardner Under Fire* Jeffrey A. Schaler, 2006 Thirteen critical essays challenge Howard Gardner's theories of multiple intelligences, ability traits, U-shaped curves in development, and other psychological concepts of spirituality, creativity, and leadership. All are answered by Gardner himself, and his pungent replies coupled with the essays create a provocative, no-holds-barred debate. Also included are an intellectual autobiography and bibliography.

The Leaders We Need Michael Maccoby, 2007 A leader is someone people follow. But why do people follow? Books abound on leaders, but much less is known about followers. In *The Leaders We Need*, Maccoby steps into this yawning gap in the literature. This insightful book shows that followers have their own powerful motivations to follow. Many relate to their leader as to some important person from the past: a parent, a sibling, a close friend. With major shifts in family structure and other social changes, especially transformations in technology and work life, these transferences have grown complex, making leaders' work more challenging. The key for modern-day leaders: being sensitive to how a group's collective psychology and social context shape its leadership needs. For example, factory workers in a large city during a period of relative calm would need very different leaders than people working in a start-up management consultancy during a time of stiffening competition. The author outlines the profound shift from a more bureaucratic society and leadership model to an interactive, collaborative one and provides crucial advice on how to become a leader we need.

Offering provocative psychological insight and thoughtful analysis of social and cultural changes this book examines leadership through an entirely new lens     *The ... Pfeiffer Annual* ,2004     **The Teacher as Assessment Leader** Thomas R. Guskey,2009 The Teacher as Assessment Leader explores the importance of effective classroom assessment and the responsibility of the teacher to ignite positive change inside the classroom Packed with practical strategies for designing analyzing and using assessments from expert practitioners this book shows how to turn best practice in classroom assessment into usable solutions for everyday teaching     **Business World** ,2008-03
