Ebook Educational Effectiveness Ineffectiveness Critical Knowledge:

EBOOK: Education Studies: Issues & Critical Perspectives Derek Kassem, Emmanuel Mufti, John Robinson, 2006-08-16

This major text for Education Studies students provides a critical account of key issues in education today. The text features a critical analysis of key issues in Education Studies to encourage students thinking about education in the broadest terms. Themed sections with introductions to link the issues discussed in each chapter. Use of specific examples of educational diversity to illustrate how concerns such as ethnicity, gender and class operate in educational institutions. An examination of educational issues as they relate to other phases of educational provision such as home schooling and universities. Education Studies Issues and Critical Perspectives is an essential text for Education Studies students. It is also of value to students on QTS courses and students and professionals in areas such as sociology, childhood studies, community studies and education policy.

Knowledge, Values and Educational Policy Harry Daniels, Hugh Lauder, Jill Porter, 2009. Knowledge Values and Educational Policy asks fundamental questions about what schools are for and what should be taught in them, explores one of the newest areas of interest, learning across boundaries and examines issues of diversity and equity, locating these issues in terms of policies and practices within school.

Health Informatics - E-Book Ramona Nelson, Nancy Staggers, 2013-06-14. Health Informatics: An Interprofessional Approach was awarded first place in the 2013 AJN Book of the Year Awards in the Information Technology Informatics category. Get on the cutting edge of informatics with Health Informatics: An Interprofessional Approach. Covering a wide range of skills and systems, this unique title prepares you for work in today's technology-filled clinical field. Topics include clinical decision support, clinical documentation, provider order entry systems, system implementation, adoption issues, and more. Case studies, abstracts, and discussion questions enhance your understanding of these crucial areas of the clinical space. 31 chapters written by field experts give you the most current and accurate information on continually evolving subjects like evidence-based practice, EHRs, PHRs, disaster recovery, and simulation. Case studies and attached discussion questions at the end of each chapter encourage higher-level thinking that you can apply to real-world experiences. Objectives, key terms, and an abstract at the beginning of each chapter provide an overview of what each chapter will cover. Conclusion and Future Directions section at the end of each chapter reinforces topics and expands on how the topic will continue to

evolve Open ended discussion questions at the end of each chapter enhance your understanding of the subject covered

Today Is Tomorrow M. Scott Norton, 2019-11-18 This book focuses on today's education relative to its effectiveness for preparing students for the future The matter of purposes for education today remains controversial in that future success looms important by a considerable portion of the citizenry while preparing for success in the future is of great importance for other individuals and groups The book considers both sides of the purpose question Predicting the needs for the future is a difficult matter at best

Is discipline the best way to achieve an effective management of classroom learning? Paulette Reefer, 2016-12-08 Seminar paper from the year 1993 in the subject Pedagogy School Pedagogics grade A The University of the West Indies St Augustine course In Service Diploma in Education Programme language English abstract This essay attempts to engage in a philosophical psychological and sociological exploration of the misconceptions and the truths of the statement Effective management of classroom learning can best be achieved through discipline This essay proposes that there are varying kinds of discipline types that can be counterproductive to the processes of education and learning and others which can result in increased and effective management of teaching and learning within the classroom The topic under discussion is thus considered a highly contentious and debatable issue This essay addresses the underlying assumptions of the statement which suggest that there are other methods of effective management of classroom learning but discipline is the best approach In addition it explores the subsequent logical conclusion that if indeed discipline is the best method for effectively managing classroom learning it follows that the best disciplinarians will achieve optimum learning

with students of their classrooms In conventional usage discipline means to bring under control to educate or train There is a distinction to be made between varying types of discipline prevailing within schools These can be placed easily into two categories good effective discipline and bad ineffective discipline Phillips Weiner and Haring explain that good discipline is not a matter of punishment or a brutal attitude It emphasizes the development of a structure which is conducive to the child's learning achieving and developing emotional and social maturity They posit that good discipline in schools helps to promote self discipline as a habitual way of behaving Self discipline contributes to self assurance and thus affects one's outlook and confidence and as such it is conducive to learning On the other hand they refer to bad discipline as discipline that is too harsh too quickly administered and too defeating Haring Weiner and Phillips 1960 Close and prolonged observation within many public and private schools at both primary and secondary levels would perhaps reveal varying interlacing of both good and bad discipline systems Few would argue that maintaining good discipline is a necessary prerequisite to establishing a school or classroom climate that is conducive to learning This belief is conceded to by Curving and Mendler *Total Quality Management in Education* Edward Sallis, 2014-08-07 This text has been written for managers in higher education as well as for headteachers and deputy heads in the school sector Total quality management TQM is a philosophy and a methodology that is widely used in business and increasingly in education to manage change or other processes With the pressure for change and quality in education never more acute this book provides an opportunity for readers in education to acquaint themselves with TQM Revised and updated this edition introduces the key concepts of TQM in the education context It discusses organizational leadership and teamwork issues and the tools and techniques of TQM This text should help educators develop a framework for quality management in their school college department or university

Redesigning Teacher Education Alan R. Tom, 1997-09-25 Alan Tom is among the best at relating important issues in teacher education and a critical reading of the literature with his own professional experience This book is ambitious It lives up to the claim of examining political and institutional problems along with conceptual and intellectual ones This is something few teacher educators attempt and is a critical area to open up for sustained analysis Drawing upon events from his career as a teacher educator Alan R Tom candidly analyzes the predominant criticisms of teacher education and rejects the common tendency to infer the teacher education curriculum from such ideas as metaphors for teaching or knowledge He proposes eleven design principles to serve as a reform agenda including creating programs capable of self renewal having faculty model the desired image and skills of teaching and rethinking the sequence of practice and theory Each principle identifies a differing dimension for the conceptual and structural redesign of teacher preparation Four specific change strategies are evaluated as well task force top down piloting and family style The low status of teacher educators and the excessive regulation of teacher education are also examined as is the failure to give adequate attention to the administrative organization for teacher education
