Expressibility and the Problem of Efficient Text Planning Marie Meteer,2015-12-17 A central problem of natural language generation is that of expressibility Meteer presents a solution which uses a level of representation called the Text Structure an intermediate between the representation of world and the language **Linguistic Issues in Machine**

Translation Frank Van Eynde,2015-12-17 The key assumption in this text is that machine translation is not merely a mechanical process but in fact requires a high level of linguistic sophistication as the nuances of syntax semantics and intonation cannot always be conveyed by modern technology The increasing dependence on artificial communication by private and corporate users makes this research area an invaluable element when teaching linguistic theory **New**

Concepts in Natural Language Generation Helmut Horacek,2015-12-17 This book aims to inform researchers with an interest in natural language generation about advances in the field It is organised around four topics system architectures content planning discourse planning and realisation in linguistic form and it presents some of the most important works in this area of research **Evolutionary Language Understanding** Geoffrey Sampson,2015-12-17 This book records a

unique attempt over a ten year period to use stochastic optimization in the natural language processing domain Setting the work against the background of the logical rule based approach the author provides a context for understanding the differences in assumptions about the nature of language and cognition Text Knowledge and Object Knowledge Annely Rothkegel,2015-12-17 Rothkegel argues that text production is the result of interaction between text knowledge and object knowledge the conventional ordering and presentation of knowledge for communicative purposes and the conceptual organisation of world knowledge

User Modelling in Text Generation Cecile Paris,2015-12-17 This book addresses the issue of how the user s level of domain knowledge affects interaction with a computer system It demonstrates the feasibility of incorporating a model of user s domain knowledge into a natural language generation system **Core Curriculum for**
