Making Public in a Privatized World David A. McDonald, 2016-02-15 How do we provide effective public services in a deeply neoliberal world In the wake of the widespread failure of privatisation efforts societies in the global south are increasingly seeking progressive ways of recreating the public sector With contributors ranging from cutting edge scholars to activists working in health water and energy provision and with case studies covering a broad spectrum of localities and actors Making Public in a Privatized World uncovers the radically different ways in which public services are being reshaped from the grassroots up From communities holding the state accountable for public health in rural Guatemala to waste pickers in India and decentralized solar electricity initiatives in Africa the essays in this collection offer probing insights into the complex ways in which people are building genuine alternatives to privatization while also illustrating the challenges which communities face in creating public services which are not subordinated to the logic of the market or to the monolithic state entities of the past

The Post-Election Violence in Kenya Sosteness Francis Materu, 2014-12-04 Since the historic Nuremberg Trial of 1945 an international customary law principle has developed that commission of a core crime under international law war crimes genocide crimes against humanity and aggression should not go unpunished History shows that when in Africa such violations occurred especially as a result of election disputes national and regional actors including the African Union resorted to political rather than legal responses However when crimes against humanity were alleged to have been committed in Kenya during the 2007 2008 post election violence a promising

road map for criminal accountability was agreed upon alongside a political solution In the spirit of this road map the author analyzes the post election violence in Kenya from a legal point of view He extensively examines legal options for domestic criminal accountability and discusses both retributive prosecutions and restorative justice mainly truth commission mechanisms being the main legal responses to the gross violations of human rights Furthermore he thoroughly investigates the Kenya situation before the ICC and the legal cum political responses to the ICC intervention in Kenya Practitioners and academics in the field of international criminal law and related disciplines as well as political sciences and legal history will find in this book highly relevant information about alternative legal approaches of the fight against and punishment of crimes against humanity as defined under the ICC Statute

Urbanization and Industrialization for Africa's Transformation ,2017 The 2017 Economic Report on Africa focuses on the linkages between industrialization and urbanization Urbanization is one of Africa mega trends with profound implications for the social economic environmental dimensions of growth and transformation Theory and experience demonstrate that industrialization and urbanization can be mutually reinforcing processes It is therefore imperative to explore the linkages between urbanization and industrialization given the profound implications for structural transformation in Africa So far current policy narratives and frameworks on structural transformation and industrialization in Africa have largely failed to factor in the spatial and urban dimensions of industrialization and in particular the advantages presented by productivity

enhancement and agglomeration effects generated by cities Yet the nexus between urbanization and industrialization is of particular relevance for Agenda 2063 and the 2030 Agenda on Sustainable Development Both agendas recognize urbanization as a critical factor for sustainable development It is also important to consider urbanization and industrialization in light of Africa s engagement with the Third United Nations Conference on Housing and Sustainable Urban Development Habitat III to be held in Quito Ecuador in October 2016 In this context African policy makers have clearly recognized urbanization as an engine of structural transformation for inclusive and sustainable growth
