Evaluation of a Methodology for Ecodesign Implementation Aleksandar Mihailović, Johan Jandér, 2004 *Life Cycle Assessment* Michael Z. Hauschild, Ralph K. Rosenbaum, Stig Irving Olsen, 2017-09-01 This book is a uniquely pedagogical while still comprehensive state of the art description of LCA methodology and its broad range of applications The five parts of the book conveniently provide I the history and context of Life Cycle Assessment LCA with its central role as quantitative and scientifically based tool supporting society s transitioning towards a sustainable economy II all there is to know about LCA methodology illustrated by a red thread example which evolves as the reader advances III a wealth of information on a broad range of LCA applications with dedicated chapters on policy development prospective LCA life cycle management waste energy construction and building nanotechnology agrifood transport and LCA related concepts such as footprinting ecolabelling design for environment and cradle to cradle IV A cookbook giving the reader recipes for all the concrete actions needed to perform an LCA V An appendix with an LCA report template a full example LCA report serving as inspiration for students who write their first LCA report and a more detailed overview of existing LCIA methods and their similarities and differences *ECODESIGN -- The Competitive Advantage* Wolfgang Wimmer, Kun Mo LEE, Ferdinand Quella, John Polak, 2010-09-11 Dealing with environmental issues should no longer be considered simply as a cost of doing business Effective environmental improvements to a company s products and services can be turned into business opportunities This book was written with the express purpose of helping managers of companies in particular of Small to Medium sized Enterprises SMEs to better deal with environmental challenges and address customer requirements all in order to turn their environmental investments into competitive market advantages Several examples are provided throughout the book but also warning signs Alert Boxes These Alerts are posted to help managers avoid typical traps when working with environmental considerations in business processes The authors have many years of experience in the various aspects of implementing Ecodesign This experience includes working in industry for many years leading the environmental departments in

a multinational company managing research projects in eco product development Life Cycle Assessment and national and international environmental communication and marketing This book is the latest in a series The 2002 Ecodesign Pilot introduced a tool and software to help design more environmentally compatible products It was directed specifically at designers The 2004 book Ecodesign Implementation was written to help project managers optimize product development processes from an environmental perspective New Trends and Developments in Automotive Industry Marcello Chiaberge,2011-01-08 This book is divided in five main parts production technology system production machinery design and materials and tries to show emerging solutions in automotive industry fields related to OEMs and no OEMs sectors in order to show the vitality of this leading industry for worldwide economies and related important impacts on other industrial sectors and their environmental sub products *Ecodesign* Kun-Mo Lee,2005 **How Central Authorities Can Support Ecodesign** Bernan,2008 Eco design presents an integrated approach to develop products with as small environmental footprint as possible taking a life cycle perspective However still the vast majority of manufacturing companies do not use eco design or at least they do not use it in their marketing Taking a company perspective this report tries to understand why Its ambition has been to identify and explain the incentives companies have for implementing eco design practices in their product development Ultimately the report is trying to answer the question on how authorities can use these incentives to better support eco design The findings presented in the report are based on interviews with Nordic manufacturing companies experts in the field and a literature survey Conclusions are followed by general recommendations on how to stimulate the use of eco design in companies *ECODESIGN Pilot* Wolfgang Wimmer,Rainer Züst,2003-01-31 Up to now environmental policies have relied mainly on rules regulations and prohibitions This kind of environmental policy a clearly reactive approach has shown a mounting array of limitations There is a clear need to seek new solutions in particular those involving the initiative of firms themselves Since the mid 1980 s a new approach called environmental management has been established in research and practical applications it is designed to systematically integrate environmental considerations into company activities If for instance environmental objectives are being formulated for an enterprise it is imperative to identify highlight and analyze real and significant environmental impacts of the firm s activities and to take appropriate measures to improve its performance Controlling and implementing these environmental objectives requires suitable structures procedures and tools Many motivated companies have approached the issue of environmental management through incorporating methods such continual improvement processes and Life Cycle Assessment into the various operational activities of the enterprise Some firms initiated such transformation processes at their own production sites because it was easier to identify their own environmental impacts than to analyze let alone mitigate the effects of upstream and downstream processes However in many cases these processes are decisive factors in the overall environmental performance of a product It has become clear that product design can influence these processes to a great extent Proceedings of the ...
