**Force:A Fundamental Concept of Aesthetic Anthropology** Christoph Menke,2013 This book reconceives modern aesthetics by reconstructing its genesis in the 18th century between Baumgarten s Aesthetics and Kant s Critique of Judgment Force demonstrates that aesthetics and hence modern philosophy began twice On the one hand Baumgarten s Aesthetics is organized around the new concept of the subject as a totality of faculties an agent defined by capabilities one who is able Yet an aesthetics in the Baumgartian manner as the theory of the sensible faculties of the subject at once faces a different aesthetics the aesthetics of force The latter conceives the aesthetic not as sensible cognition but as a play of expression propelled by a force that rather than being exercised like a faculty does not recognize or represent anything because it is obscure and unconscious the force of what in humanity is distinct from the subject The aesthetics of force is thus a thinking of the nature of man of aesthetic nature as distinct from the culture acquired by practice It founds an anthropology of difference between force and faculty human and subject

**Figure and Force in Animation Aesthetics** Ryan Pierson,2020 How can we describe movements in animated films In Figure and Force in Animation Aesthetics Ryan Pierson introduces a powerful new method for the study of animation By looking for figures arrangements that seem to intuitively hold together and forces underlying units of attraction repulsion and direction Pierson reveals startling new possibilities for animation criticism history and theory Drawing on concepts from Gestalt psychology Pierson offers a wide ranging comparative study of four animation techniques soft edged forms walk cycles camera movement and rotoscoping as they appear in commercial artisanal and avant garde works In the process through close readings of little analyzed films Pierson demonstrates that figures and forces make fertile resources for theoretical speculation unearthing affinities between animation practice and such topics as the philosophy of mathematics scientific and political revolution and love Beginning and ending with the imperative to look closely Figure and Force in Animation Aesthetics is a performance in seeing the world of motion anew

oriented thinkers examine aesthetic experience and moral concerns and relate to the work of their British counterparts The chapters here cover the work of Kant Moses Mendelssohn Alexander Gottlieb Baumgarten and Madame de Staël Finally Part III explores the interrelation of science aesthetics and a new model of society in the work of Goethe Johann Wilhelm Ritter Friedrich Hölderlin and William Hazlitt among others This volume develops unique discussions of the rise of aesthetic autonomy in the eighteenth century In bringing together well known scholars working on British and German eighteenth century aesthetics philosophy and literature it will appeal to scholars and advanced students in a range of disciplines who are interested in this topic The Introduction and Chapters 2 10 and 12 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

*Practical Aesthetics* Bernd Herzogenrath, 2020-10-15 This collection brings together artists and theoreticians to provide the first anthology of a new field Practical Aesthetics A work of art already contains its own criticism a knowledge of its own which need not be conceptual or propositional Yet today there are many approaches to different forms of art that work on the brink between science and art sensible cognition and proposition aesthetic knowledge and rational knowledge while thinking with art or the artistic material rather than about it This volume presents ways of thinking with different forms of art film sound dance literature etc as well as new forms of aesthetic research and presentation such as Media Philosophy the audiovisual essay fictocriticism the audio paper and Artistic Research It reveals how writing about art can become artistic or poetic in its own right not only writing about artistic effects but producing them in the first place This takes art not as an object of external analysis but as a subject with a knowledge in its own right creating a co-composing conceptual interference pattern between theory and practice A practical aesthetics thus understood can be described as thinking with art in order to find new ways to create worlds and thus to make the world perceivable in different ways
