Force And Freedom Reflections On History Beacon Paperback:

Force and Freedom Jacob Burckhardt, James Hastings Nichols, 1964 History Siegfried Kracauer, Paul Oskar Kristeller, 1995 A study of the relationship between past and present and the relation between histories in different levels of generality One after another Siegfried Kracauer examines various theories of history and exposes their strengths and weaknesses **Print, Power, and Cultural Hegemony** Federico Dal Bo, 2024-09-23 Federico Dal Bo examines the design of early Hebrew books from the late fifteenth and sixteenth centuries focusing not only on the words in these early books but also on how they were arranged on the page He follows in the tradition of scholars such as Christopher de Hamel Marvin J Heller and David Stern who have explored the importance of these Hebrew books in influencing Jewish learning and attracting the interest of Christians The author discusses important prints such as the first Talmud and rabbinical bibles which marked a shift from being for Jewish readers only to being for both Jews and Christians The collaboration between Jewish editors and Christian printers changed the way these books looked and the audience for whom they were intended At first these early prints copied the style of handwritten Hebrew manuscripts The simple layout could be difficult to read especially for long books like the Bible or Talmud But over time influenced by the humanism of the Italian Renaissance the layout became more complex The book also looks at how the layout changed from full page commentaries to a more complicated design in which the main text and commentaries shared the same page This shift challenged the idea of who was the primary author and emphasized the role of editors The layout with the main text in the center and the commentaries on the sides created a kind of unwritten rule for how to read religious texts Dal Bo's study also includes new information about a 1553 trial in which the Talmud was burned Overall it explores how the layout of these early Hebrew books shaped cultural power and influenced how people read Baroque and the Political Language of Formalism (1845 - 1945): Burckhardt, Wölfflin, Gurlitt, Brinckmann, Sedlmayr Evonne Levy, 2015-12-22 This study in intellectual history places the art historical concept of the Baroque amidst world events political thought and the political views of art historians themselves Exploring the political biographies and writings on the Baroque primarily its architecture of five prominent Germanophone figures Levy gives a face to art history showing its concepts arising in the world From Jacob Burckhardt's still debated Jesuit style to Hans Sedlmayr's Reichsstil the Baroque concepts of these German Swiss and Austrian art historians all politically conservative and two of whom joined the Nazi party were all took shape in reaction to immediate social and political circumstances A central argument of the book is that basic terms of architectural history drew from a long established language of political thought This vocabulary applied in the formalisms of Wölfflin and Gurlitt has endured as art history's unacknowledged political substrate for generations Classic works like Wölfflin's *Kunstgeschichtliche Grundbegriffe* are interpreted anew here supported by new documents from the papers of each figure Modern Perspectives in Western Art History W. Eugene Kleinbauer, Medieval Academy of America, 1989-01-01 A collection of essays that reflect the breadth of twentieth century

scholarship in art history Kleinbauer has sought to illustrate the variety of methods scholars have developed for conveying the unfolding of the arts in the Western world Originally published by Holt Rinehart and Winston 1971 *Indian Naval Strategy in the Twenty-first Century* James R. Holmes, Andrew C. Winner, Toshi Yoshihara, 2009-04-02 This is the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions By a quirk of historical fate Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea ushering in centuries of Western dominance In the 21st century however Asian states are once again resuming a naval focus with both China and India dedicating some of their new found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces The United States like the British Empire before it is attempting to manage these rising sea powers while preserving its maritime primacy This book probes how India looks at the sea what kind of strategy and seagoing forces New Delhi may craft in the coming years and how Indian leaders may use these forces It examines the material dimension but its major premise is that navies represent a physical expression of a society's history philosophical traditions and culture This book then ventures a comprehensive appraisal of Indian maritime strategy This book will be of interest to students of sea power strategic studies Indian politics and Asian Studies in general James R Holmes is an Associate Professor of Strategy at the U S Naval War College and a former U S Navy surface warfare officer Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College Andrew C Winner is Professor in the Strategic Research Department at the U S Naval War College [A Libertarian Critique of Intellectual Property - Digital Book](#) Butler Shaffer, 2014-01-07 What is the status of intellectual property Are patents and copyrights legitimate in a free society Butler Shaffer is a distinguished libertarian legal theorist who has for many years taught at Southwestern Law School in Los Angeles In this monograph he addresses an important question that has aroused much interest among libertarians What is the status of intellectual property Are patents and copyrights legitimate Shaffer responds with an appeal to fundamental libertarian principles Only arrangements that people freely negotiate with one another are acceptable laws imposed by a coercive state are not Judged by this standard intellectual property fails People may make contracts that limit the sale or transmission of ideas or books but these bind only those who make them Intellectual property laws by contrast apply to everyone whether people accept them or not These laws could not have arisen through voluntary agreements Defenders of intellectual property maintain that inventors and writers need protection for their work Without patents and copyrights inventions and creative work would be impeded Shaffer responds that most of the great creators and inventors of the past worked without patents and copyrights Leonardo da Vinci and Shakespeare for example did rather well without this sort of state privilege [A Libertarian Critique of Intellectual Property](#) is a major contribution to libertarian legal theory and an indispensable guide to a vital topic [American Book Publishing Record Cumulative, 1950-1977](#) R.R.
