The Semantics and Proof Theory of the Logic of Bunched Implications David J. Pym, 2013-04-17 This is a monograph about logic Specifically it presents the mathematical theory of the logic of bunched implications BI I consider BI's proof theory model theory and computation theory However the monograph is also about informatics in a sense which I explain Specifically it is about mathematical models of resources and logics for reasoning about resources I begin with an introduction which presents my background view of logic from the point of view of informatics paying particular attention to three logical topics which have arisen from the development of logic within informatics Resources as a basis for semantics Proof search as a basis for reasoning and The theory of representation of object logics in a meta logic The ensuing development represents a logical theory which draws upon the mathematical philosophical and computational aspects of logic Part I presents the logical theory of propositional BI together with a computational interpretation Part II presents a corresponding development for predicate BI In both parts I develop proof model and type theoretic analyses I also provide semantically motivated computational perspectives so beginning a mathematical theory of resources I have not included any analysis beyond conjecture of properties such as decidability finite models games or complexity I prefer to leave these matters to other occasions perhaps in broader contexts

Automated Model Building Ricardo Caferra, Alexander Leitsch, Nicolas Peltier, 2004-09-13 On the history of the book In the early 1990s several new methods and perspectives in automated deduction emerged We just mention the superposition calculus meta term inference and schematization deductive decision procedures and automated model building It was this last one which brought the authors of this book together In 1994 they met at the Conference on Automated Deduction CADE 12 in Nancy and agreed upon the general point of view that semantics and in particular construction of models should play a central role in the field of automated deduction In the following years the deduction groups of the laboratory LEIBNIZ at IMAG Grenoble and the University of Technology in Vienna organized several bilateral projects promoting this topic This book emerged as a main result of this cooperation The

authors are aware of the fact that the book does not cover all relevant methods of automated model building also called model construction or model generation instead the book focuses on deduction based symbolic methods for the construction of Herbrand models developed in the last 12 years Other methods of automated model building in particular also nite model building are mainly treated in the nal chapter this chapter is less formal and detailed but gives a broader view on the topic and a comparison of di erent approaches Howtoreadthisbook In the introduction we give an overview of automated deduction in a historical context taking into account its relationship with the human views on formal and informal proofs **Inference on the Low Level** Hannes Leitgeb,2004-08-13 Originally presented as the author s thesis Ph D University of Salzburg 2001

The Virgin Birth According to Temple Christology David H. Wenkel,2024-09-17 The Virgin Birth According to Temple Christology builds an exegetical theological and catholic case for understanding Jesus incarnation as an act of divine temple construction It attempts to explain that Jesus the temple had to have a virgin mother because of Jesus unique status as the temple of God who was made without human hands This study answers the call to reintroduce the nexus between Christology and typology as they were originally bound together by theologians such as Athanasius of Alexandria Unfortunately for most of church history Christology and typology have gone their separate ways This divergence is so stark that the imagery and words of scripture have lost their voice in the context of Christian dogmatics David H Wenkel demonstrates that a typological study of biblical persons events and institutions can increase our understanding of Jesus especially of his virginal conception Thus this study is a resource for a wide range of Christian traditions **Practical Models for Technical Communication**
