The Year's Best Science Fiction ,2001 **The Cambridge History of Science Fiction** Gerry Canavan,Eric Carl Link,2019-01-03 The first science fiction course in the American academy was held in the early 1950s In the sixty years since science fiction has become a recognized and established literary genre with a significant and growing body of scholarship The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past Science fiction as a literary genre is the central focus of the volume but fundamental to its story is its non literary cultural manifestations and influence Coverage thus includes transmedia manifestations as an integral part of the genre s history including not only short stories and novels but also film art architecture music comics and interactive media

To Boldly Stay Sherry Ginn,Michael G. Cornelius,2022-05-04 Despite the fact that Star Trek Deep Space Nine ended over twenty five years ago there has yet to be a stand alone assessment of the series This collection corrects that omission examining what made Deep Space Nine so unique within the Star Trek universe and how that uniqueness paved the way for an altogether new entirely different vision for Star Trek If the Star Trek slogan has always been to boldly go where no one has gone before then Deep Space Nine helped to bring in a new renaissance of serialized television that has become normal practice Furthermore Deep Space Nine ushered in critical discussions on race gender and faith for the franchise science fiction television and American lives It relished in a vast cast of supporting characters that allowed for the investigation of psychosocial relationships from familial issues to interpersonal and interspecies conflict to regional strife that the previous Star Trek series largely overlooked Essays explore how Deep

Space Nine became the most richly complicated sci fi series in the entire Star Trek pantheon *The Best of Trek* Walter Irwin, G. B. Love, 1978 Science Fiction, Fantasy, & Horror, 1988 A comprehensive bibliography of books and short fiction published in the English language *The Year's Best Fantasy and Horror*, 2006 **Space Stories**, 1952 Top of the News, 1982 **The Heating and Ventilating Magazine**, 1921 **Air Conditioning, Heating and Ventilating**, 1921

Critical Terms for Science Fiction and Fantasy Gary K. Wolfe, 1986-08-18 The critical vocabulary of the mainstream often give short shrift to the fantastic and scholars of the fantastic have often had to look elsewhere for their critical terminology Such scholars will find Wolfe's work an excellent resource Choice *Science Fiction, an Illustrated History* Sam J. Lundwall, 1978 This book presents for the first time a broad view of the themes authors development and ideas of the genre on an international scale It embraces science fiction in Europe Latin America Asia Russia and Australasia as well as the better known American and British areas Cover **Space and Beyond** Gary Westfahl, 2000-01-30 Although the exploration of space has long preoccupied authors and filmmakers the development of an actual space program discoveries about the true nature of space and critical reconsiderations of America's frontier experiences have challenged and complicated conventional portrayals of humans in space This volume reexamines the themes of space and the frontier in science fiction in light of recent scientific and literary developments From this new perspective we discern previously unnoticed commentaries from older authors while newer writers either remain within a reassuring but obsolete tradition venture into unexplored new realities or abandon space to focus on other frontiers The intriguing contributions to this volume include a previously unpublished interview with Arthur C Clarke the world's greatest living author of science fiction examinations of space opera by veteran author Jack Williamson and scholar David Pringle surveys of space in science fiction film and writer and producer Michael Cassutt's account of his efforts to launch a film based on a Clifford D Simak novel and speculations about future developments from noted writers Gregory Benford Jack Dann James Gunn and Howard V Hendrix **The Mechanics of Wonder** Gary Westfahl, 1998 This is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl's resurrection of Hugo Gernsback for decades a largely derided figure as the true creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback's importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re-evaluation of the importance of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition The Mechanics of Wonder will arouse debate

and force the questioning of presuppositions No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read The Best of Jim Baen's Universe Eric Flint,2008-05-20 Top selling established writers and brilliant newcomers both appear regularly in the online magazine Jim Baen s Universe edited by Eric Flint creator of the New York Times best selling Ring of Fire series Now editor Flint selects a generous serving of the best science fiction and fantasy stories that have appeared in the magazine Hugo and Nebula Award winners such as Mike Resnick and Gene Wolfe are on board and so are best selling writers David Drake Gregory Benford Esther Friesner and more Jim Baen s Universe is already a resounding hit on the internet and is certain to be equally popular in the uncybernetic realm of paper reading as well **Startling Stories** ,1953
