Introduction to Mathematical Thinking Keith J. Devlin, 2012 Mathematical thinking is not the same as doing math unless you are a professional mathematician For most people doing math means the application of procedures and symbolic manipulations Mathematical thinking in contrast is what the name reflects a way of thinking about things in the world that humans have developed over three thousand years It does not have to be about mathematics at all which means that many people can benefit from learning this powerful way of thinking not just mathematicians and scientists Back cover

Conjecture & Proof Diane Driscoll Schwartz, 1997 *Distilling Ideas* Brian P. Katz, Michael Starbird, 2013 Mathematics is not a spectator sport successful students of mathematics grapple with ideas for themselves Distilling Ideas presents a carefully designed sequence of exercises and theorem statements that challenge students to create proofs and concepts As students meet these challenges they discover strategies of proofs and strategies of thinking beyond mathematics In order words Distilling Ideas helps its users to develop the skills attitudes and habits of mind of a mathematician and to enjoy the process of distilling and exploring ideas Distilling Ideas is an ideal textbook for a first proof based course The text engages the range of students preferences and aesthetics through a corresponding variety of interesting mathematical content from graphs groups and epsilon delta calculus Each topic is accessible to users without a background in abstract mathematics because the concepts arise from asking questions about everyday experience All the common proof structures emerge as natural solutions to authentic needs Distilling Ideas or any subset of its chapters is an ideal resource either for an organized Inquiry Based Learning course or for individual study A student response to Distilling Ideas I feel that I have grown more as a mathematician in this class than in all the other classes I've ever taken throughout my academic life [An Introduction to](#)
