Working with Children and Youth with Complex Needs Michael Ungar,2014-09-25 Working with Children and Youth with Complex Needs provides a detailed description of

techniques and rich stories of how social workers psychologists counselors and child and youth care workers can help young people become more resilient With ample case studies and fascinating explanations of research Dr Ungar shows why we need to work just as hard changing the environments that surround children as we do changing children themselves Building on lessons learned from clinical community and residential settings Dr Ungar discusses 20 skills that can enhance the effectiveness of frontline mental health services Along with descriptions of the skills necessary to talk with clients about the factors that put their mental health at risk Working with Children and Youth with Complex Needs also presents systemic practices clinicians can use in their everyday work Engaging with children s extended family addressing issues of community violence racism and homophobia and helping parents and teachers understand children s maladaptive coping strategies as sometimes necessary are among the many practical strategies that are discussed which clinicians can use to enhance and sustain the therapeutic value of their work

Stress And The Family Hamilton I McCubbin, Charles R. Figley, 2014-06-17
First published in 1983 This is Volume 1 of two in a collection of on stress and the family The books view the family as both producing and reacting to stress and attempt to identify the sources of stress from either inside or outside the family microsystem Further the volumes distinguish between sudden unpredictable and overwhelming catastrophic stress and the more normal gradual and cumulative life stressors encountered over the life span Moreover the series brings into focus several rich perspectives which effectively integrate the hundreds of generalizations about the functional and dysfunctional methods family members use to cope with stress

Stress and the Family: Coping with normative transitions
Hamilton I. McCubbin, Charles R. Figley, 1983

Family Stress, Coping, and Social Support Hamilton I. McCubbin, A. Elizabeth Cauble, Joan M. Patterson, 1982

Family Transitions Celia Jaes Falicov, 1991-07-01 Of all concepts used by family therapists the family development framework is among the least studied in spite of its relevance to understanding spontaneous family change and to facilitating therapeutic intervention The notion that a developmental difficulty underlies the appearance of clinical symptoms has become a time honored tradition in family therapy just as it has been in individual therapy Yet unlike the well established and well researched models of child and adult development those in family development are rudimentary Despite increasing interest in the family life cycle as a framework for family therapy relatively little has been done to elucidate the specific dimensions and processes of spontaneous and therapeutically induced change over the family life cycle This volume gathers original contributions of some of the most prominent family theorists researchers and clinicians of our time to improve our understanding of these important and hitherto neglected domains The book opens with a comprehensive overview by the editor that outlines contributions to the family life cycle framework from family sociology and crisis theory This is followed by a comparative analysis of developmental thinking explicit or implicit in the theory and interventions of the major family therapy approaches Then divided into four parts FAMILY TRANSITIONS introduces new conceptual models that integrate

the temporality of the life cycle approach with systems theory By their very nature these models cut across therapeutic orientations and have important clinical applications In Part II family therapy's views of development are freed from the confines of the therapist's office and placed in the context of other disciplines Chapters provide analysis of changing or static sociocultural values that can affect conceptions of development potential misuse of the concept of cultural identity in health mental health and education how family identity operates as a vehicle for cultural transmission over generations and family therapists' assumptions about women's development The role of expected and unexpected events in the family life cycle is the focus of Part III Chapters on clinical approaches geared to dislocations of life cycle occurrences due to unexpected crises chronic illnesses loss or drug abuse provide illustrations of interventions that utilize enhance or potentially detract from the family's developmental flow Part IV explores the articulation of the life cycle framework within four major family therapy orientations intergenerational structural systemic and symbolic experiential Each of these chapters endeavors to elucidate what is the place of family development in each orientation concepts of continuity and change use of the concept of stages transitions or developmental tasks the specific dimensions that change in most families over time and the links between family dysfunction and life cycle issues Finally each chapter illustrates through clinical example assessment strategies formulation of treatment goals and interventions as these emerge from a particular life cycle model FAMILY TRANSITIONS presents a significant advance in our understanding of functional and dysfunctional family development and offers a range of interventions to promote developmental change It is an invaluable resource for clinical psychologists psychiatrists social workers and counselors that will also interest human development professionals family sociologists and family researchers FAMILY TRANSITIONS can serve as a developmentally oriented textbook for teaching family therapy in academic and professional settings

Guiding Families through Transitions Todd M. Edwards, JoEllen Patterson, James L.

Griffith, 2025-03-18 An indispensable clinical resource and text this book offers therapists evidence based strategies to support families through life's inevitable transitions Chapters explore typical life cycle stages couple formation parenthood adolescence young adulthood and midlife and later life and describe treatment principles for frequently encountered family challenges The book normalizes developmental strains and underscores the significance of flexibility adaptability and resilience through adversity Extensive case examples encompass a range of family forms cultural and individual differences and life cycle disruptions including parental separation illness and loss Family Stress Coping and Resilience GREGORY J. HARRIS, Fiorella Luisa Carlos, 2018-12-26 *Handbook of Stressful Transitions Across the Lifespan* Thomas W. Miller, 2010 The modern life cycle is characterized by stressful transitions when unexpected events and even many expected ones challenge people's functioning health and sense of self worth The international multidisciplinary perspectives provided in the *Handbook of Stressful Transitions Across the Lifespan* cover these periods as they occur through youth adulthood and aging bringing together theoretical and clinical findings case studies and literature reviews in one authoritative volume A diverse

panel of clinicians researchers and educators focuses on the psychological biological cultural and spiritual factors surrounding not only trauma and loss but also coping and growth risk and mitigating factors and promising interventions Whether topics are just beginning to receive in depth attention the first job becoming adoptive parents ongoing issues requiring new insights veterans adjustment to civilian life chronic illness or emerging concepts trauma growth animal assisted therapy coverage is well written engaging and eminently useful A sampling of the topics featured in the Handbook The developmental neurobiology of stress The long term effects of divorce on children Self regulation across life transitions Money in E motion stressful financial transitions The influence of food on adapting to life stressors The transition to retirement as a stressful event With its comprehensive scope and wealth of data the Handbook of Stressful Transitions Across the Lifespan will appeal to a variety of professional readers including researchers and scholars in the fields of social developmental and clinical psychology sociology and public health

Family Stress Hamilton I. McCubbin, Pauline G. Boss, 1980 *Coping with Family Changes* Janet M. Bender, 2019-09-15 *Family Change and Crisis Workbook* Ester A. Leutenberg, John J. Liptak, 2015-07-15 At some time or another most families experience changes then experience stress resulting from the changes and then go into crisis mode However not all families have a crisis as a result of the stress from change Resilient families are able to rebound from adversity to flex in response to the pressures and strains of everyday family life to become stronger after the change and to adapt with more resources at their disposal Resiliency refers to the coping strengths of the individual members and the combined coping strengths of the family as a whole Families who exhibit resiliency are flexible when dealing with stress have coping strengths that can be called upon when experiencing a stressor and have the ability to reorganize in the face of stress to become stronger and better In order to maintain an effective and useful family unit family members must develop skills for managing change coping with stress and building resiliency from external and internal stressors The Family Change Crisis Workbook provides assessments and self guided activities to help family members explore old patterns of interaction and behavior that are no longer effective and to identify ways to develop more effective interactions and behaviors Many choices of self exploration assessments and activities are provided for family members to use collaboratively with other family members to develop a healthy family unit The Family Change Crisis Workbook is designed to be used either independently or as part of an integrated curriculum You may administer any of the assessments and the guided self exploration activities to an individual or multiple family members with whom you are working or you may administer any of the activities over multiple sessions Feel free to pick and choose those assessments and activities that best lead to the outcomes you desire The assessments and activities are divided into four chapters to help you identify and select assessments easily and quickly Chapter I Family Changes This chapter helps family members explore the types and intensity of the stressful changes the family is currently going through Chapter II Family Stress This chapter helps family members explore how well they are managing their current family stress and explore ways to cope more

effectively with change and stress Chapter III Family Crisis This chapter helps family members explore how difficult a change can be on some or all family members and ways to manage and cope with issues and crises Chapter IV Family Resilience This chapter helps family members explore ways that the family can come together and build resilience as a family after stressful changes and crises

Family Stress Management Pauline Boss, Chalandra M. Bryant, Jay A. Mancini, 2016-07-27 Why do some families survive stressful situations while others fall apart Can a family's beliefs and values be used as a predictor of vulnerability to stress And most importantly can family stress be prevented The Third Edition of Family Stress Management continues its original commitment to recognize both the external and internal contexts in which distressed families find themselves With its hallmark Contextual Model of Family Stress CMFS the Third Edition provides practitioners and researchers with a useful framework to understand and help distressed individuals couples and families The example of a universal stressor a death in the family highlights cultural differences in ways of coping Throughout there is new emphasis on diversity and the nuances of family stress management such as ambiguous loss plus new discussions on family resilience and community as resources for support

Stress, Coping, and Health in Families Hamilton I. McCubbin, Elizabeth A. Thompson, Anne I. Thompson, Julie E. Fromer, 1998-06-08 Rather than investigating the pathology of families under stress this book takes the unusual step of studying individuals families and ethnic groups moving towards health This approach provides new insights as to why some families manage life events with relative ease and recover from adversity with renewed strength harmony and purpose The contributors develop the concept of a family and culturally induced sense of coherence as the key to promoting health and well being

Families in Transition Lynne A. Bond, Barry M. Wagner, 1988-04 This volume presents a group of exemplary prevention programmes documents their accomplishments and provides models for the future development of other programmes Each of the contributors has gone beyond the stage of theorising and model building to translate ideas into fully operating programmes which have been evaluated and demonstrated to be effective The prevention promotion efforts presented consider the well being of individuals the family unit as a whole and broader societal structures in which families are embedded The focus is on both normative and non normative family transitions through the life span of the family

Family Transitions Philip A. Cowan, E. Mavis Hetherington, 2016-05-13 This volume the result of the second annual Summer Institute sponsored by the Family Research Consortium focuses on family transitions both normative and non normative The subject of family transitions has been a central concern of the consortium largely because studies of families in motion help to highlight mechanisms leading to adaptation and dysfunction This text represents a collective effort to understand the techniques individuals and families employ to adapt to the pressing issues they encounter along their life course
