Berez-Kroeker, Bradley McDonnell, Eve Koller, Lauren B. Collister, 2022-01-18 A guide to principles and methods for the management archiving sharing and citing of linguistic research data especially digital data Doing language science depends on collecting transcribing annotating analyzing storing and sharing linguistic research data This volume offers a guide to linguistic data management engaging with current trends toward the transformation of linguistics into a more data driven and reproducible scientific endeavor It offers both principles and methods presenting the conceptual foundations of linguistic data management and a series of case studies each of which demonstrates a concrete application of abstract principles in a current practice In part 1 contributors bring together knowledge from information science archiving and data stewardship relevant to linguistic data management Topics covered include implementation principles archiving data finding and using datasets and the valuation of time and effort involved in data management Part 2 presents snapshots of practices across various subfields with each chapter presenting a unique data management project with generalizable guidance for researchers The Open Handbook of Linguistic Data Management is an essential addition to the toolkit of every linguist guiding researchers toward making their data FAIR Findable Accessible Interoperable and Reusable **Belonging in Brixton** Audrey Allwood, 2020-11-19 This volume provides a unique perspective on elderly working class West Indian migrants in the UK particularly examining how they negotiate their sense of belonging Utilizing the life span gaze and including elements of oral history and narrative this ethnography provides rich insight into the ordinary lives migratory circumstances social networks and interactions with the state as residents in a sheltered housing scheme in Brixton London The author further compiles a variety of genealogy charts providing a uniquely vivid scholarly analysis of the Caribbean migrant experience both in a place and through space and time Ultimately this work contemplates how communities face change whilst at once developing a local symbolic cultural site navigating adaptation to new economic and social environments **Japanese Understanding of Salvation** Martin Heißwolf, 2018-02-14 It is no secret that Christianity has been widely rejected in Japan with less than two percent of the population identifying as Christian The dominant worldview in Japan is deeply animistic with beliefs such as the Japanese mana concept ki the

Japanese soul concept and the concept of God god s kami being deeply rooted in the culture and fundamentally influencing society Dr Martin Hei wolf with his years of experience in Japan critically examines Japanese animism in light of core Christian beliefs such as the concepts of peace and salvation Central to Japanese people s rejection of Christian truth is the diametric opposition of its supernatural message to the natural focus of Japanese animistic folk religion Hei wolf s meticulous study is framed squarely within missiological thought and praxis so Christians serving in Japanese contexts are better able to communicate the message of the gospel by more fully understanding Japanese people people by whom God wants to be known

A Realist Account of Stress, PTSD, and Resilience Frank Tortorello, 2021-09-30 This book rejects traditional dominant typically reductive and anti realist explanations of stress PTSD and resilience Frank Tortorello presents the United States Marine Corps doctrinal explanation of stress PTSD and resilience as a case in point using new realist theoretical resources from Rom Harr and Charles R Varela The author systematically exposes the scientific and ethical failures of traditional explanations in accounting for the actions of stressed and resilient Marines on and off the battlefield The power of new realist explanations emerges in application to the same ethnographic data thereby supporting the author s call to replace traditional explanations with those grounded in new realism

Religion Index One, 2003 *Anthropology and Ethics* May May Mandelbaum Edel, May M. Edel, Abraham Edel, 1959 This book presents the results of an experiment in interdisciplinary collaboration to clarify theories of morality and anthropology and philosophy showing how each may be enriched by borrowing from the other Pooling the resources and methods of their respective fields anthropology and philosophy May and Abraham Edel examine the wide range of moral differences in the world to establish coordinates for the more systematic mapping of particular moralities to explore more explicitly the relations of morality to cultural patterns and social processes and to see how philosophic issues of ethical theory become refined and reformulated when their cultural content is made manifest The book contains an implicit suggestion that the anthropologist should focus on morality as an independent area of study and that the philosopher should stop treating morality in isolation Anthropology tends to include morality as an incidental part of other inquiries Philosophy on the other hand tends to cut morality off from the framework of psychological and cultural processes the result is a kind of deadlock in ethical theory The Edels observe that to develop a working concept of morality at least as well developed as that furnished for religion anthropology can benefit from philosophic methods of analyzing concepts and from philosophical ways of conceptualizing problems of ethical theory On the other hand philosophy can use the methods of anthropology to approach morality in more meaningful terms This study is not addressed only to professionals its aim rather is to provide an orientation to morality itself in a world in which human problems are becoming extremely complex and have to be confronted directly as moral

Choice and Morality in Anthropological Perspective George N. Appell, T. N. Madan, 1988-01-01 This book explores choice behavior as constrained by culture biology and psychoanalytic processes in a variety of ethnographic contexts in Southeast Asia Oceania and Africa

the arena in which the controversy between Derek Freeman and anthropologist Margaret Mead's ideas of culture first developed. It also examines the interface between a nomothetic anthropology and a hermeneutic idiographic anthropology, raising the critical question as to how ethnographic knowledge of another culture is achieved and transmitted to others. Freeman rejects an exclusive reliance on either culture or biology as key to explaining human behavior, proposing instead an interactionist paradigm. Fundamental to this paradigm is choice behavior, which is intrinsic to our biology and basic to the formation of culture. For cultures are the accumulation of socially sanctioned past choices. However, the greater the freedom to choose, the greater the scope for good or bad, and the greater the need for ethics, rules, and laws for defining prohibited alternatives. *Choice and Morality* investigates these themes. Its authors examine the emergent nature of social reality as a result of choice behavior and illustrate the complexity of Freeman's theoretical position.

New Perspectives on Moral Change Cecilie Eriksen, Nora Hämäläinen, 2022-08-12 The world we live in is constantly changing. Climate change, transforming gender conceptions, emerging issues of food consumption, novel forms of family life, and technological developments are altering central areas of our forms of life. This raises questions of how to cope with and understand the moral changes implicit in such alterations. This volume is the first to address moral change as such. It brings together anthropologists and philosophers to discuss how to study and theorize the change of norms, concepts, emotions, moral frameworks, and forms of personhood.

Experiments in Living Alexander Macbeath, 1952 **Experiments in Living**, 1952 **Experiments in Living** Alexander Macbeath, 1952 Anthropology and Ethics May Edel, 1868 **Lectures on Anthropology** Immanuel Kant, 2012-12-20 Kant was one of the inventors of anthropology, and his lectures on anthropology were the most popular and among the most frequently given of his lecture courses. This volume contains the first translation of selections from student transcriptions of the lectures between 1772 and 1789, prior to the published version *Anthropology from a Pragmatic Point of View* 1798, which Kant edited himself at the end of his teaching career. The two most extensive texts, *Anthropology* Friedländer 1772 and *Anthropology* Mrongovius 1786, are presented here in their entirety, along with selections from all the other lecture transcriptions published in the Academy edition, together with sizeable portions of the *Menschenkunde* 1781, 2, first published in 1831. These lectures show that Kant had a coherent and well-developed empirical theory of human nature, bearing on many other aspects of his philosophy, including cognition, moral psychology, politics, and philosophy of history.

Experiments in Living A. MacBeath, 2013 An Anthropology of Ethics James D. Faubion, 2011-04-14 Through an ambitious and critical revision of Michel Foucault's investigation of ethics, James Faubion develops an original program of empirical inquiry into the ethical domain. From an anthropological perspective, Faubion argues that Foucault's specification of the analytical parameters of this domain is the most productive point of departure in conceptualizing its distinctive features. He further argues that Foucault's framework is in need of substantial revision to be of genuinely anthropological scope. In making this revision, Faubion illustrates his program with two extended case studies: one

of a Portuguese marquis and the other of a dual subject made up of the author and a millenarian prophetess The result is a conceptual apparatus that is able to accommodate ethical pluralism and yield an account of the limits of ethical variation providing a novel resolution of the problem of relativism that has haunted anthropological inquiry into ethics since its inception

A Companion to Moral Anthropology Didier Fassin, 2015-01-20 A Companion to Moral Anthropology is the first collective consideration of the anthropological dimensions of morals morality and ethics Original essays by international experts explore the various currents approaches and issues in this important new discipline examining topics such as the ethnography of moralities the study of moral subjectivities and the exploration of moral economies Investigates the central legacies of moral anthropology the formation of moral facts and values the context of local moralities and the frontiers between moralities politics humanitarianism Features contributions from pioneers in the field of moral anthropology as well as international experts in related fields such as moral philosophy moral psychology evolutionary biology and neuroethics
