Anthropology-Based Computing John N.A. Brown, 2016-03-16 We have always built tools to improve our productivity and help us lead better lives however we find ourselves constantly battling against our new computerized tools making us less productive and putting our health and our lives at risk This book looks at Human Computer Interaction HCI from a truly human centred perspective focusing on human physiology and psychology rather than the motley series of brilliant innovations glorified mistakes and cross generational habits that comprise the computer centred HCI that we practice today This three part guide argues that human interest and calm technology need to be at the heart of HCI It begins by exposing the inherent dangers in past and present HCI Using his past experiences within Anthropology Linguistics Education Ergonomics Human Factors and Computer Science the author introduces and explores the theory of Anthropology Based Computing ABC as well as a new ideas like Dynamic Environmental Focus DEF a new model of General Human Interaction GHI and a new triune model of the brain Brown s Representation of Anthropogenic Interaction in Natural Settings BRAINS Detailed illustrations show how HCI can be improved by considering how human bodies and brains actually work The final part is a series of simple illustrated experiments each applying an aspect of ABC to improve the way our computers and computerized devices treat us Anthropology Based Computing is written for those who work with computers not just those who work on them Students and researchers in Design and Psychology and Computer Scientists as well will benefit from seeing what is missing from the devices that are already in place why that is and how to make the practical changes that will immediately improve the physiological and psychological experience of using phones on board navigation systems and the countless other computers we use at work and at home today and will continue to use in the future [Computerworld](#)
