The Good Is One, Its Manifestations Many Robert Cummings Neville,2016-09-30 Presents a twenty first century progressive liberal Confucianism Building on his long standing work in metaphysics and Asian philosophy Robert Cummings Neville presents a series of essays that cumulatively articulate a contemporary progressive Confucian position as a global philosophy Through analysis of the metaphysical and moral traditions of Confucianism Neville brings these traditions into the twenty first century According to Confucianism rituals define most of our relations with other individuals social institutions and nature and while rituals make possible the positive institutions of high human civilization they may also lead to harmful behaviors including racism xenophobia and sexism Neville argues that the amendment of rituals that institutionalize oppression is a positive task which should be undertaken from within a skillfully ritualized life rather than in the form of external criticism Confucianism in Neville s hands is a left wing progressive liberal political philosophy one that can address institutionalized oppression and suggest a path for moving forward Defining Religion Robert Cummings

Neville,2018-01-18 Provides a new orientation to philosophy of religion and a new theory of how religion ought to be defined In this collection of essays written over the past decade Robert Cummings Neville addresses contemporary debates about the concept of religion and the importance of the comparative method in theology while advancing and defending his own original definition of religion Neville s hypothesis is that religion is a cognitive existential and practical engagement of ultimate realities five ultimate conditions of existence that need to be engaged by human beings The essays which range from formal articles to invited lectures develop this hypothesis and explore its ramifications in religious experience philosophical theology religious studies and the works of important thinkers in philosophy of religion Defining Religion is an excellent introduction to Neville s work especially to the systematic philosophical theology presented in his magisterial three volume set *Philosophical Theology* Diversifying Philosophy of Religion Nathan R. B. Loewen,Agnieszka Rostalska,2023-06-01

Much philosophical thinking about religion in the Anglophone world has been hampered by the constraints of Eurocentrism colonialism and orientalism Addressing such limitations head on this exciting collection develops models for exploring global diversity in order to bring philosophical studies of religion into the globalized 21st century Drawing on a wide range of critical theories and methodologies and incorporating ethnographic feminist computational New Animist and cognitive science approaches an international team of contributors outline the methods and aims of global philosophy of religion From considering the importance of orality in African worldviews to interacting with Native American perspectives on the cosmos and investigating contemplative studies in Hinduism each chapter demonstrates how expertise in different methods can be applied to various geographical regions building constructive options for philosophical reflections on religion *Diversifying*

Philosophy of Religion raises important questions regarding who speaks for and represents religious traditions setting the agenda for a truly inclusive philosophy of religion that facilitates multiple standpoints **Religion** Robert Cummings Neville, 2015-01-08 Religion is the third and final volume in Robert Cummings Neville's systematic development of a new philosophical theology. Unfolding through his earlier volumes *Ultimates* and *Existence* and now in *Religion*, philosophical theology considers first order questions generally treated by religious traditions through philosophical methods while reflecting Neville's long engagement with philosophy, theology, and Eastern and Western religious traditions. In this capstone to the trilogy, Neville provides a theory of religion and presents a sacred worldview to guide religious participation. His philosophical theory of value enlightens religions' approaches to ethics, spirituality, and religious institutional living and collaboration. With a detailed examination of plausibility conditions for sacred worldviews, the book concludes with an exploration of religionless religion for which institutions of religion are of penultimate value. Through the development of philosophical theology, Neville has built a unique multidisciplinary comparative nonconfessional theological system, one that addresses concerns and provides tools for scientific and humanistic scholars of religion, postmodern thinkers, intellectuals from both secular and religious backgrounds, and those interested in the global state of religion today. *Systematic Philosophical Theology, Volume 2a* William Lane Craig, 2025-03-25 These volumes are chock full of arguments in a way that stands out in this field. This is a remarkable generational work that will become the resource in philosophical theology. J. P. Moreland, Distinguished Professor of Philosophy, Biola University. An enormous undertaking. However, Craig's past record indicates that he can and will carry it through to completion. Furthermore, his established reputation guarantees that the work will attract wide interest and will have a ready readership. William Hasker, Emeritus Professor of Philosophy, Huntington University. A transformative journey through Christian doctrine. Volume IIa: On God: Attributes of God. William Lane Craig's *Systematic Philosophical Theology* is a multi-volume explication of Christian doctrine in the classic Protestant tradition of the *loci communes* as seen through the lens of contemporary analytic philosophy. Uniquely blending the disciplines of biblical theology, historical theology, and analytic theology, these volumes aim to provide readers with a biblical and philosophically coherent articulation of a wide range of Christian doctrines. Volume II treats the locus *On God* in two parts. The first part, Volume IIa: Attributes of God, explores the coherence of theism. Conceiving of God as an infinite and personal being of maximal greatness, Craig carefully defines and explicates the divine attributes of incorporeality, necessity, aseity, simplicity, eternality, omnipresence, omniscience, omnipotence, and goodness. In the second part, Volume IIb: Excursus on Natural Theology: The Trinity, Craig examines six arguments for God's existence, including the argument from contingency, the *kalam* cosmological argument, the argument from the applicability of mathematics, the argument from cosmic fine-tuning, the moral argument, and the ontological argument, along with the problem of evil. Following the excursus, he transitions to an articulation and defence of Christian theism, formulating a biblical doctrine of the Trinity and offering a model of God as a
