*Facility Design and Planning, Interior Design* R. M. Downey, 1980 *What Art Is* Michelle Kamhi, Louis Torres, 2016-05-26 What is art The arts establishment has a simple answer anything is art if a reputed artist or expert says it is Though many people are skeptical about the alleged new art forms that have proliferated since the early twentieth century today s critics claim that all such work however incomprehensible is art A groundbreaking alternative to this view is provided by philosopher novelist Ayn Rand 1901 1982 Best known as the author of *The Fountainhead* and *Atlas Shrugged* Rand also

created an original and illuminating theory of art which confirms the widespread view that much of today's purported art is not really art at all. In *What Art Is* Torres and Kamhi present a lucid introduction to Rand's esthetic theory contrasting her ideas with those of other thinkers. They conclude that in its basic principles her account is compelling and is corroborated by evidence from anthropology, neurology, cognitive science, and psychology. The authors apply Rand's theory to a debunking of the work of prominent modernists and postmodernists from Mondrian, Jackson Pollock, and Samuel Beckett to John Cage, Merce Cunningham, and other highly regarded postmodernist figures. Finally, they explore the implications of Rand's ideas for the issues of government and corporate support of the arts, art law, and art education. This is one of the most interesting, provocative, and well-written books on aesthetics that I know. While fully accessible to the general reader, *What Art Is* should be of great interest to specialists as well. Ayn Rand's largely unknown writings on art, especially as interpreted, released from dogma, and smoothed out by Torres and Kamhi, are remarkably refined. Moreover, her ideas are positively therapeutic after a century of artistic floundering and aesthetic quibbling. Anyone interested in aesthetics, in the purpose of art, or in the troubling issues posed by modernism and postmodernism should read this book.

Randall R. Dipert, Author of *Artifacts*, *Art Works*, and *Agency*

Torres and Kamhi effectively situate Rand's long neglected esthetic theory in the wider history of ideas. They not only illuminate her significant contribution to an understanding of the nature of art; they also apply her ideas to a trenchant critique of the twentieth century's advanced art. Their exposure of the invalidity of abstract art is itself worth the price of admission.

Chris Matthew Sciabarra, Author of *Ayn Rand: The Russian Radical*

Rand's aesthetic theory merits careful study and thoughtful criticism, which Torres and Kamhi provide. Their scholarship is sound; their presentation is clear, and their judgment is refreshingly free from the biases that Rand's supporters and detractors alike tend to bring to considerations of her work.

*Light: The Shape of Space*

Designing with Space and Light

Lou Michel

Every design professional who touches a space shapes the light and the feeling of that space. Architect, lighting engineer, interior designer, lighting or home furnishing manufacturer: each contributes an aesthetic layer, sometimes yielding unexpected results. All too often the best laid plans of one professional are unintentionally subverted by another. Removing surprises and guess work from design.

Lou Michel, honored architectural lighting educator, has created *Light: The Shape of Space*, showing how to design with the effects of light rather than light itself. The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials. Drawing on over fifteen years' experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas, Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived, not in architectural photos or paint chips and fabric swatches, but by human vision, the gateway to emotional response. The book was written for professionals who care about how people feel in the spaces they design, and focuses on the humanization of architecture.

Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as *Light The Shape of Space* *American Book Publishing Record Cumulative, 1950-1977* R.R.
