James O. Young, 1995 This text seeks to provide an answer to the perennial question what is truth According to the global anti realist the truth conditions of all classes of sentences are detectable by speakers The author argues that the only way to be a global anti realist is to maintain that the truth conditions of all sentences are the conditions under which they cohere with a system of beliefs Global anti realism is a form of coherence theory of truth Realists are committed to some form of correspondence theory Both camps are opposed to deflationary accounts of truth according to which truth is not a property of sentences
