Poverty

and Exclusion in the Western Balkans Caterina Ruggeri Laderchi, Sara Savastano, 2013-02-12 This book maps the latest developments in the policy relevant analysis on poverty inclusion and the social agenda in the Western Balkans. It does so by presenting a selection of recent papers which explore from a methodological and analytical point of view how the inclusion agenda can be monitored and adapted to understand the challenges in the region. The volume includes an overview and four sections covering respectively: 1 innovations in terms of measurement of poverty and inclusion in the region; the concept of inclusion as elaborated at the EU level; innovations in survey design to suit the measurement of inclusion; methodological insights from qualitative work; 2 innovative country level analysis updating poverty mapping in inter censal years; the analysis of material deprivation; the analysis of determinants of social inclusion; subjective wellbeing of public work programs participants; 3 examples of country level analysis of drivers of exclusion; barriers to formalization in the labour market; gender disparities in the labour market; disruption in social networks following urbanizations; attitudes towards multi ethnic states; 4 building inclusive safety nets; an assessment of safety nets in the region; the political economy of welfare reform; micro simulations of social assistance reform; the adoption of better tools to improve targeting performance. The chapters combine sophisticated techniques which are at the frontiers of poverty analysis: small area estimation; efficiency analysis applied to household welfare; micro simulations with less ground breaking papers which take advantage of innovative datasets or perspectives deeply grounded in the policy dialogue in the countries of the region. By providing a wide spectrum of innovative and policy relevant analytical contributions, this book will be of broader interest than for observers of the region.

Inequality and Fiscal Policy Mr. Benedict J. Clements, Ruud A. de Mooij, Mr. Sanjeev Gupta, Mr. Michael Keen, 2015-09-21 The sizeable increase in income inequality experienced in advanced economies and many parts of the world since the 1990s and the severe consequences of the global economic and financial crisis have brought distributional issues to the top of the policy agenda. The challenge for many governments is to address concerns over rising inequality while simultaneously promoting economic efficiency and more robust economic growth. The book delves into this discussion by analyzing fiscal policy and its link with inequality. Fiscal policy is the government's most powerful tool for addressing inequality. It affects households' consumption directly through taxes and transfers and indirectly via incentives for work and production and the provision of public goods and individual services such as education and health. An important message of the book is that growth and equity are not necessarily at odds with the appropriate mix of policy instruments and careful policy design. Countries can in many cases achieve better distributional outcomes and improve economic efficiency. Country studies on the Netherlands, China, India, Republic of Congo and Brazil demonstrate the diversity of challenges across countries and their differing capacity to use fiscal policy for redistribution. The analysis presented in the book builds on and extends work done at the IMF and also includes contributions from leading academics. **Counting the Poor** Douglas J. Besharov, Kenneth A. Couch, 2012-07-05 With contributions from the world's foremost authorities on social measurement, this volume promises to

be the definitive reference for poverty researchers and policymakers seeking to disengage politics from measurement
