**A Generation of Radical Educational Change** Richard Pring, Martin Roberts, 2015-12-14 How much have teachers and their pupils benefitted from the top down Westminster led control of policy held in place by a powerful national inspection regime A Generation of Radical Educational Change Stories from the Field is an exploration of the revolutionary impact of the greater and continuing involvement of central government in education policy making which began in 1976 and was accelerated by the 1988 Education Act and subsequent legislation In the book a dozen distinguished contributors from a wide range of sectors explain and reflect on how they worked to do their best for their schools teachers and pupils in these years of great change They understand the reasons explained by Lord Baker in his early chapter for a National Curriculum in 1988 and also the reasons for a more effective national inspection system Yet their stories accumulate to become a powerful critique of the top down policies of the last two decades These policies have been too numerous short term incoherent and partisan governments have been indifferent to professional opinion and serious research and have relied excessively on measurable outcomes and simplistic Ofsted judgments Our current system is narrower and less democratic than it was but evidence is hard to find that English pupils are doing any better in international comparisons The combined reflections in this volume are timely in these years of lively educational debate as are the suggestions for future policy A Generation of Radical Educational Change is an invaluable read for current and aspiring headteachers policy makers and those with an interest in education policy and how it evolves

*Thinking Critically about Environments for Young Children* Lisa P. Kuh, 2014-06-13 This comprehensive book will help early childhood practitioners consider the why and how of setting up classrooms and other learning spaces to create environments that are most conducive to child development Using a practice based focus and a researcher lens the contributors consider the ways in which environments for children enhance or diminish educational experiences how social constructs about what is good for children influence environmental design and what practitioners can do in their own work when creating learning environments for young children There are copious examples from practice lessons learned and illustrations and photographs of key aspects of the environments they discuss

Threads of Thinking Cathy Nutbrown, 1999-07-23 If you are interested in understanding the behaviour and interests of young children this is the place to start Cathy Nutbrown draws upon her own extensive experience of working with children and Early Years Practitioners to demystify the concept of Schemas These are recognizable patterns of behaviour which indicate how children are making the connections necessary for the development of thought and understanding The extensive illustrations and jargon free text make this an excellent text for students parents and workers who wish to be more closely in tune with young children It is the book that I most often lend or recommend to Early Years colleagues and students Seriously interested readers will almost certainly also wish to read the seminal work of Chris Athey 1990 Extending Thought in Young Children A

Parent Teacher Partnership published by Paul Chapman Publishing London Amazon Review If you are interested in understanding the behaviour and interests of young children this is the place to start Cathy Nutbrown draws upon her own extensive experience of working with children and Early Years Practitioners to demystify the concept of Schemas These are recognizable patterns of behaviour which indicate how children are making the connections necessary for the development of thought and understanding The extensive illustrations and jargon free text make this an excellent text for students parents and workers who wish to be more closely in tune with young children It is the book that I most often lend or recommend to Early Years colleagues and students Seriously interested readers will almost certainly also wish to read the seminal work of Chris Athey 1990 Extending Thought in Young Children A Parent Teacher Partnership published by Paul Chapman London Amazon Review The focus of Threads of Thinking is on children s patterns of learning and thinking particularly schemas However the book as a whole is much more than that and provides material for reflection by anyone working with and for young children Many of the examples discussed are ones considered in the First Edition but the changes Cathy Nutbrown has made throughout the book bring it right up to date including some speculation on the ideas of a foundation stage in England There is much here that is valuable for reading alone but also a lot that could be shared by groups of people including those already working in the field as well as those in training International Journal of Early Years Education There are some excellent sections on scientific and mathematical learning in Part Three Many practical ideas are provided for developing these concepts in young children There are also excellent sections on literacy that again provide valuable insight into developing these concepts There are valuable ideas and suggestions in the book and I feel that teachers of young children in nurseries or early years settings would be quite interested in the contents Education Review Threads of Thinking Second Edition is a book for teachers in nursery and early education and for other professional educators who wish to support and develop children s thinking The author presents evidence of continuity and progression in young children s thinking and shows with detailed observations that they are able and active learners She considers aspects of children s patterns of learning and thinking or schemas and demonstrates clearly how children learn in an active dynamic and creative way Numerous examples of young children in action are used which illustrate their learning in areas of literacy mathematics and science Implications for curriculum assessment and work with parents are thoroughly considered in a style that compels attention to children s own learning agendas Threads of Thinking was first published in 1994 and though children s ways of learning may not have changed the national context of early childhood education has undergone quite radical change In response to these and other important policy developments this fully revised Second Edition includes numerous detailed descriptions of children learning and discusses those observations in the light of our understanding about how children learn and how early childhood educators might teach The impact of current national policies is addressed throughout including the implications for teachers of early assessment and the relationship of assessment to learning "Code of Massachusetts
