Microsoft SQL Server is a complete set of technologies and tools that enterprises use to deliver database and business intelligence solutions. Enterprises employ database administrators to maintain and optimize their organizations' data solutions. The role of a database administrator includes ensuring database security, availability, and performance that satisfies business requirements. Microsoft Learning now introduces the next round of its SQL Certification program with exams covering the new version of the SQL Server software: Microsoft SQL Server 2012. The exams and certification path differ significantly from the two previous versions of SQL Server. This provides an opportunity for the MS line to capitalize on the dual disruption of brand new software and brand new certifications. These product offerings for Microsoft SQL Server 2012 will focus on the baseline database administrator professional certification, providing the skills necessary for students to enter the workforce.
