Fables Comprehension Questions:

Text Structures and Fables Gretchen Bernabei, Jayne Hover, 2022-09-30 State tests are assessing reading and writing together. Are you ready? I wish students would interact with a text on their own. I wish it wasn't like pulling teeth to get them to elaborate their thinking. Wish no more because bestselling author Gretchen Bernabei shows you how to guide students to be nimble at both short answer and extended responses. Her secret? Teach students text structures and they can pour their swirling ideas about the text into cogent writing. Using the accessible format of fables, Bernabei and Hover share lessons and an appendix full of fables so you can teach students five concrete ways to respond to text in any genre. Generate basic responses using structures that support clarity. Craft fiction inspired by the text to unveil literary knowledge and imaginative response. Write essays about a theme or moral that display empathic and evidence-based interpretation. Answer open-ended questions by selecting a technique that reflects the text and their engagement. Use non-traditional formats like graphics and spoken dialogue to showcase their learning. The heat is on! Beginning in third grade, state tests are now assessing reading and writing together. And that's a good thing, but we've got some catching up to do. With **Text Structures and Fables** in hand, your students will swiftly and surely become text-savvy readers and writers.

Critical Thinking & Classic Tales: Fables ,

When (and How) Theory of Mind Is Useful? Evidences from Research in the Life-Span Francesca Baglio, Antonella Marchetti, 2017-02-17 Theory of Mind (ToM) or mentalization is the ability to understand and foresee the behavior referring to one's own and others' mental states. Premack Wimmer Perner 1983. This capacity, which is considered the most representative mechanism of social cognition, is a multifaceted set of competences liable to influence and be influenced by a manifold of psychosocial aspects. Studies on typical and atypical clinical development during life showed that ToM is frequently delayed, e.g., in deafness or impaired in many clinical conditions, e.g., Autism Spectrum Disorder, Attention Deficit Hyperactivity Disorder, Schizophrenia, Borderline Personality Disorder, Parkinson's Disease, Alzheimer's Disease, and on the other hand, may not be unequivocally a positive experience. It is therefore possible to consider the existence of multiple kinds of Theory of Mind. In fact, ToM may vary along a quantitative and a qualitative continuum. As for the quantitative dimension, the continuum is constituted by the fluctuation between high and low levels of ToM ability in different clinical conditions. Along this continuum, impairment can mean not enough ToM, for example in Autism Spectrum Disorder, as well as too much ToM, for example in Schizophrenia and Borderline Personality Disorder. The qualitative dimension, highly interrelated with the quantitative one, regards the shift between adaptive, e.g., prosocial, nice ToM vs. unadaptive, e.g., antisocial, nasty ToM mental states content. The issue is discussed in light of recent evidence from outstanding researchers working on typical and atypical clinical populations along the life span. Findings from the fields of psychology, neuropsychology, and neuroscience enrich the research topic argumentation.
