Facing Climate Change An Integrated Path To The Future

Brendan G. Carr

Facing Climate Change An Integrated Path To The Future:

Facing Climate Change Jeffrey T. Kiehl, 2016-03-01 Facing Climate Change explains why people refuse to accept evidence of a warming planet and shows how to move past partisanship to reach a consensus for action A climate scientist and licensed Jungian analyst Jeffrey T Kiehl examines the psychological phenomena that twist our relationship to the natural world and their role in shaping the cultural beliefs that distance us further from nature He also accounts for the emotions triggered by the lived experience of climate change and the feelings of fear and loss they inspire which lead us to deny the reality of our warming planet But it is not too late By evaluating our way of being Kiehl unleashes a potential human emotional understanding that can reform our behavior and help protect the Earth Kiehl dives deep into the human brain s psychological structures and human spirituality s imaginative power mining promising resources for creating a healthier connection to the environment and one another Facing Climate Change is as concerned with repairing our social and political fractures as it is with reestablishing our ties to the world teaching us to push past partisanship and unite around the shared attributes that are key to our survival Kiehl encourages policy makers and activists to appeal to our interdependence as a global society extracting politics from the process and making decisions about our climate future that are substantial and sustaining

Climate Change and American Policy John R. Burch, Jr., 2016-08-26 Climate change has long been a contentious issue even before its official acknowledgment as a global threat in 1979 Government policies have varied widely from Barack Obama s dedication to environmentalism to George W Bush s tacit minimizing of the problem to Republican officials refusal to acknowledge the scientific evidence supporting anthropogenic climate change Presented chronologically this collection of important policy shaping documents shows how the views of both advocates and deniers of climate change have developed over the past four decades

Environmental Literacy and New Digital Audiences Pat Brereton, 2018-12-07 Environmental literacy and education is not simply a top down process of disseminating correct attitudes values and beliefs Rather it is one that incorporates and facilitates a dialogue with audiences of different persuasions and at all levels of engagement to help highlight and co produce consensual solutions to the major eco challenges of our time Exploring the growing power and influence of media formats and outlets like YouTube and gaming alongside fictional and documentary film this book considers new modes of environmental literacy to ascertain the effectiveness of digital and filmic stimuli on an audience s perception of environmental issues and its specific impact on environmental action Drawing on extensive research across a broad range of media formats Brereton establishes how environmental narratives and meanings are created and being received by contemporary audiences This book will be of great interest to students and scholars of environmental communication and media eco criticism and environmental humanities more broadly

Climate Crisis and Consciousness Sally Gillespie, 2019-10-10 Climate crisis disrupts the beliefs values and behaviors of contemporary societies sparking potential for radical changes in culture and consciousness Drawing upon her experience as a Jungian psychotherapist and a

researcher in the field of climate psychology Sally Gillespie writes about the challenges dilemmas opportunities and transformations of engaging with climate and ecological crises Many factors shape how we understand and respond to the existential threats of climate crisis This accessible book with its discussions about worldviews cultural myths emotional resilience social connectedness nature relatedness and collective action explores consciousness change in those most engaged with climate issues Calling upon the words and stories of many people including Indigenous leaders ecologists campaigners writers and philosophers Gillespie encourages us to enter into climate conversations to forge emotional resilience ecological consciousness and inspired action With its unique focus on the psychological experience of facing into the climate crisis this warm and supportive book offers companionship and sustenance for anyone who wants to be alive to our natural world and to the existential challenges of today It is an essential resource for counsellors psychotherapists social workers and other helping professionals as well as climate campaigners policy makers educators scientists and researchers

Lacan and the Environment Clint Burnham, Paul Kingsbury, 2021-07-15 In this exciting new collection leading and emerging Lacanian scholars seek to understand what psychoanalysis brings to debates about the environment and the climate crisis They argue that we cannot understand climate change and all of its multifarious ramifications without first understanding how our terrifying proximity to the real undergirds our relation to the environment how we mistake lack for loss and mourning for melancholy and how we seek to destroy the same world we seek to protect The book traces Lacan's contribution through a consideration of topics including doomsday preppers forest suicides Indigenous resistance post apocalyptic films the mathematics of climate science and the relevance of Kant They ask What can you do if your neighbour is a climate change denier What would Bartleby do Does the animal desire Who is cleaning up all the garbage on the internet Why is the sudden greening of the planet under COVID 19 no help whatsoever It offers a timely intervention into Lacanian theory environmental studies geography philosophy and literary studies that illustrates the relevance of psychoanalysis to current social and environmental concerns

The Planetary Clock Paul Giles, 2021-02-11 The theme of The Planetary Clock is the representation of time in postmodern culture and the way temporality as a global phenomenon manifests itself differently across an antipodean axis To trace postmodernism in an expansive spatial and temporal arc from its formal experimentation in the 1960s to environmental concerns in the twenty first century is to describe a richer and more complex version of this cultural phenomenon Exploring different scales of time from a Southern Hemisphere perspective with a special emphasis on issues of Indigeneity and the Anthropocene The Planetary Clock offers a wide ranging revisionist account of postmodernism reinterpreting literature film music and visual art of the post 1960 period within a planetary framework By bringing the culture of Australia and New Zealand into dialogue with other Western narratives it suggests how an antipodean impulse involving the transposition of the world into different spatial and temporal dimensions has long been an integral if generally occluded aspect of postmodernism Taking its title from a Florentine clock designed in 1510 to

measure worldly time alongside the rotation of the planets The Planetary Clock ranges across well known American postmodernists John Barth Toni Morrison to more recent science fiction writers Octavia Butler Richard Powers while bringing the US tradition into juxtaposition with both its English Philip Larkin Ian McEwan and Australian Les Murray Alexis Wright counterparts By aligning cultural postmodernism with music Messiaen Ligeti Birtwistle the visual arts Hockney Blackman Fiona Hall and cinema Rohmer Haneke Tarantino this volume enlarges our understanding of global postmodernism for the twenty first century

Sunburnt Country Joëlle Gergis, 2018-04-02 What was Australia's climate like before official weather records began How do scientists use tree rings ice cores and tropical corals to retrace the past What do Indigenous seasonal calendars reveal And what do settler diary entries about rainfall droughts bushfires and snowfalls tell us about natural climate cycles Sunburnt Country pieces together Australia's climate history for the first time It uncovers a continent long vulnerable to climate extremes and variability It gives an unparalleled perspective on how human activities have altered patterns that have been with us for millions of years and what climate change looks like in our own backyard Sunburnt Country highlights the impact of a warming planet on Australian lifestyles and ecosystems and the power we all have to shape future life on Earth

Governing Integrated Water Resources Management Oliver Fritsch, David Benson, 2020-01-23 Integrated Water Resources Management IWRM has become a global paradigm for the governance of surface coastal and groundwaters This Special Issue contains twelve articles related to the transfer of IWRM policy principles The articles explore three dimensions of transfer causes processes outcomes and offer a theoretically inspiring methodologically rich and geographically diverse engagement with IWRM policy transfer around the globe As such they can also productively inform a future research agenda on the dimensional aspects of IWRM governance Regarding the causes the contributions apply criticise extend or revise existing approaches to policy transfer in a water governance context asking why countries adopt IWRM principles and what mechanisms are in place to understand the adoption of these principles in regional or national contexts When it comes to processes articles in this Special Issue unpack the process of policy transfer and implementation and explore how IWRM principles travel across borders levels and scales Finally this set of papers looks into the outcomes of IWRM policy transfer and asks what impact IWRM principles once implemented gave on domestic water governance water quality and water supply and how effective IWRM is at addressing critical water issues in specific countries

Abrupt Climate Change Casey R. Cornwall, 2004

Climate Change Michael A. Toman, Brent L. Sohngen, 2004 Over the years a large and growing literature on the economics of climate change has developed Within this volume the contributors have included a wide range of journal essays that consider the impact of climate change on specific sectors goods and services the costs and benefits of greenhouse gas GHG mitigation and policy design for mitigation including both domestic instruments and issues related to international agreements

Our Energy Future Great Britain. Department of Trade and Industry, 2003 The White Paper sets out the Government's programme for reducing dependence on fossil fuels and increasing

the amount of energy generated from renewable resources There are four policy goals to work towards cutting emissions of carbon dioxide by 60% by 2050 to maintain the reliability of energy supplies to promote competitive energy markets in the UK and beyond and to ensure that homes are adequately and affordably heated There is an ambition to produce 20% of electricity from renewables by 2020 This will involve spending 348m on renewable over the four years and reforming planning rules to unblock hurdles to renewable energy A new carbon trading system will come into effect from around 2005 that will give energy suppliers and consumers incentives to switch to cleaner energy and there will also be tougher standards for energy efficiency in new homes The White paper is in four parts The first is an overview of the current situation and the need for change the second is about a low carbon economy the environmental imperatives and ways it can be achieved The third part deals with the reliability of supply competitiveness and affordability whilst the last part is entitled Delivery through Partnership
