Global Change And Local Places Estimating Understanding And Reducing Greenhouse Gases:

Global Change and Local Places Association of American Geographers GCLP Research Team, 2003-06-26 This comprehensive book explores the ways people and biota contribute to climate change in four localities of the United States. This volume summarizes the findings of the Global Change in Local Places GCLP project initiated by the Association of American Geographers to investigate the contribution of local factors to global change, how and why these factors change over time, and how the effects might be controlled and mitigated locally. The sources and driving forces for greenhouse gas emissions vary widely among the four research sites, as do the possibilities and propensities to mitigate emissions and adapt to the local changes. Global warming could bring. Policy makers and legislators will be unable to address human-induced climate change effectively without the insights revealed by examining and understanding the daily routines that are simultaneously the sources of climate change and the keys to reducing its severity and coping with its effects. *Global Change and Local Places*, 2003. How do our everyday lives affect climate change? This book compares four different sites in the United States and looks at the human factors affecting climate change, such as greenhouse gas emissions, how these factors are changing, and what can be done to mitigate the effects at a local level. Global Change and Local Places Association of American Geographers GCLP Research Team, 2003-06-26. This study of greenhouse gas emissions examines the causes and effects of climate changes triggered by human activities. It is the first major comparative study of how the emissions vary nationally at the local level and on a daily basis. The authors assess the degree of control households and firms have over the emissions they produce, how willing they are to modify their behavior to lessen climate change, and how they might adapt to the changes that will occur. **Rural Change and Sustainability** Stephen Essex, 2005-01-01. 1 Rural change and sustainability: key themes.
