**Civil Society in the Philippines** Gerard Clarke, 2013-01-17 Drawing on qualitative and quantitative research this book provides a path breaking account of civil society in the Philippines It challenges the widespread belief in political science and development studies literature that civil society in developing countries is an institutional arena in which the poor can challenge and reverse their social economic and political marginalization The book goes on to argue that Philippine civil society is a captive of organised elite interests and anti developmental in its impacts helping elites to oppose the initiatives of reform minded governments and to protect

their interests In contrast to literature suggesting that the character of civil society is a function of regime type and hence evolves in a path dependent manner the book explores the history of Philippine civil society between 1571 and 2010 and suggests that civil society is primarily a function of the evolving political economy of a country and the resulting social structure It argues that civil society in nascent democracies such as the Philippines develops in a distinctly non linear manner largely independently of regime type or regime development As a result it argues democratization in low income countries does not lead inevitably to broader participation and empowerment through civil society expansion as many academics activists and donor representatives suggest The book is of interest to students and scholars of Southeast Asian history and politics as well as those interested in the study of Non Governmental Organizations NGOs and social movements and in the statistical capture of civil society      *Global Civil Society* Lester M.
