Global Energy Security And American Hegemony Themes In Global Social Change:

Global Energy Security and American Hegemony Doug Stokes, Sam Raphael, 2010-06-07 This analysis of the United States and energy security examines the close relationship between US military supremacy in oil rich regions and America's maintenance of global power. Energy security generally evokes thoughts of American intervention in the Middle East to protect US interests in that region's oil rich fields. Doug Stokes and Sam Raphael move beyond that framework to consider US actions in Latin America, Central Asia and Africa. Drawing on State and Defense Department records and other primary sources and previous scholarship, they show how US foreign policy since World War II has sought to maintain a global energy security regime that supports the nation's allies while maintaining American hegemony. Stokes and Raphael explain how US intervention in energy rich states insulates and stabilizes those nations, transnationally oriented actors and political economies, and why American oil diversification strategy strengthens the country's position against rivals in the global capitalist system. They argue that counterinsurgency aid and other types of coercive US statecraft protect the recipient states from an array of potentially revolutionary armed and unarmed internal social forces, thereby securing the energy supplies of nations deemed strategically important to the United States or its allies. Clear and accessible, this cutting edge contemporary policy analysis will engage scholars of US foreign policy and international relations as well as policymakers grappling with the importance of energy security in today's world. *EU Energy Security in the Gas Sector* Filippas Proedrou, 2016-04-22

This book fills an important gap in the literature on energy security in the gas sector in the European Union. Whilst the emphasis is often on energy security in the oil sector, the gas sector has grown in importance in recent decades with increasing liberalization raising critical questions for the security of gas supplies. The share of gas in Europe's energy mix is rising and the differences between the politics and economics of gas and oil supply are becoming more pronounced. The author sheds light on the state of EU energy security in the gas sector, its interdependence with external suppliers and the current gas strategy. He examines the role of energy companies, EU member states and EU institutions, locates the main developments in the gas sector and focuses on the principal challenges posed by such fundamental changes. The author scrutinizes the EU's relations with its main gas supplier, Russia, as well as with alternative suppliers, elaborates on the key infrastructure projects on the table and their principal ramifications and discusses the main policies that member states pursue to achieve energy security as well as the EU's internal contradictions. The book concludes with policy

recommendations, particularly in the light of tougher environmental regulation. *Sociological Abstracts* Leo P. Chall, 2001
