**Achieving Zero Hunger** Food and Agriculture Organization of the United Nations, 2018-06-05 This report provides estimates of investment costs both public and private required to eliminate chronic dietary energy deficits or to achieve zero hunger by 2030 This target is consistent with achieving both the Sustainable Development Goal 2 to eliminate hunger by 2030 and the Sustainable Development Goal 1 to eradicate poverty The report adopts a reference baseline scenario reflecting a business as usual situation to estimate the additional investment requirements In this scenario around 650 million people will still suffer from hunger in 2030 The investment requirements to eliminate hunger by 2030 are then estimated Hunger is eliminated through a combination of social protection and targeted pro poor investments The first component aims to bring the poor immediately above the extreme poverty line through social protection by a transfer to cover the poverty gap PGT The second component involves additional investment required to stimulate and to sustain higher pro poor growth of incomes and employment than in the business as usual scenario This would in turn reduce the need for social protection to cover the PGT The analysis is complemented by looking at alternative ways to achieve zero hunger by 2030

*Social Programmes, Poverty Eradication and Labour Inclusion* Laís Wendel Abramo, Simone Cecchini, Beatriz Morales, 2019 Diverse social programmes including conditional cash transfer programmes labour and production inclusion programmes and social pensions are being implemented in Latin American and Caribbean countries with the aim of ending poverty and reducing inequalities throughout the life cycle This book offers an up to date analysis of these programmes and the way they relate to labour inclusion and analyses ongoing debates regarding the possible incentives and disincentives they

create in terms of the labour supply formalization and child labour among the target population Considering that poverty is a structural problem of highly unequal societies the thesis that poverty is due to a lack of effort on the part of the poor is argued to be an expression of the strong prejudice against those living in poverty the great majority of whom work or are actively seeking employment but are hampered by the large decent work deficits existing in the region From an integrated and rights based perspective public policies should simultaneously address the twofold challenge of social and labour inclusion in order to achieve basic thresholds of well being by ensuring income universal access to good quality social services and opportunities for decent work

The report makes clear that the challenges posed by the World Bank Group's new stance extend not just to the pursuit of these goals but indeed to their very definition and empirical content. The report also argues that an improved data infrastructure consisting of many elements including the collection of more and better survey data is critical to ensure that progress towards these goals can be measured and policies to help achieve them can be identified and prioritized.

**Poverty and Shared Prosperity 2016** World Bank Group, 2016. *Poverty and Shared Prosperity 2016* is the first of an annual flagship report that provides a global audience comprising development practitioners, policy makers, researchers, advocates, and citizens in general with the latest and most accurate estimates on trends in global poverty and shared prosperity. This edition documents trends in inequality and identifies recent country experiences that have been successful in reducing inequalities, provides key lessons from those experiences, and synthesizes the rigorous evidence on public policies that can shift inequality in a way that bolsters poverty reduction and shared prosperity in a sustainable manner. Specifically, the report addresses the following questions: What is the latest evidence on the levels and evolution of extreme poverty and shared prosperity? Which countries and regions have been more successful in terms of progress toward the twin goals and which are lagging behind? What does the global context of lower economic growth mean for achieving the twin goals? How can inequality reduction contribute to achieving the twin goals? What does the evidence show concerning global and between- and within-country inequality trends? Which interventions and countries have used the most innovative approaches to achieving the twin goals through reductions in inequality? The report makes four main contributions. First, it presents the most recent numbers on poverty, shared prosperity, and inequality. Second, it stresses the importance of inequality reduction in ending poverty and boosting shared prosperity by 2030 in a context of weaker growth. Third, it highlights the diversity of within-country inequality reduction experiences and synthesizes experiences of successful countries and policies addressing the roots of inequality without compromising economic growth. In doing so, the report shatters some myths and sharpens our knowledge of what works in reducing inequalities. Finally, it advocates for the need to expand and improve data collection, for example, data availability, comparability, and quality, and rigorous evidence on inequality impacts in order to deliver high-quality poverty and shared prosperity monitoring.

Monitoring Global Poverty World Bank, 2016-11-29. In 2013, the World Bank Group announced two goals that would guide its operations worldwide. First is the eradication of chronic extreme poverty, bringing the number of extremely poor people defined as those living on less than 1.25 purchasing power parity (PPP) adjusted dollars a day to less than 3 percent of the world's population by 2030. The second is the boosting of shared prosperity, defined as promoting the growth of per capita real income of the poorest 40 percent of the population in each country. In 2015, United Nations member nations agreed in New York to a set of post-2015 Sustainable Development Goals (SDGs), the first and foremost of which is the eradication of extreme poverty everywhere in all its forms. Both the language and the spirit of the SDG objective reflect the growing acceptance of the idea that poverty is a multidimensional concept.

that reflects multiple deprivations in various aspects of well being That said there is much less agreement on the best ways in which those deprivations should be measured and on whether or how information on them should be aggregated Monitoring Global Poverty Report of the Commission on Global Poverty advises the World Bank on the measurement and monitoring of global poverty in two areas What should be the interpretation of the definition of extreme poverty set in 2015 in PPP adjusted dollars a day per person What choices should the Bank make regarding complementary monetary and nonmonetary poverty measures to be tracked and made available to policy makers The World Bank plays an important role in shaping the global debate on combating poverty and the indicators and data that the Bank collates and makes available shape opinion and actual policies in client countries and to a certain extent in all countries How we answer the above questions can therefore have a major influence on the global economy
