Global Outsourcing And Offshoring Global Outsourcing And Offshoring:

Global Outsourcing and Offshoring Farok J. Contractor, Vikas Kumar, Sumit K. Kundu, Torben Pedersen, 2010-11-11

Companies are increasingly asking which of their value chain activities are best performed within their own company and which may be outsourced. In addition, they are also considering which pieces of their value chain may be better performed abroad. These interrelated decisions concerning outsourcing and offshoring have not only changed entire industries; they have also transformed the lives of people across the world. Hundreds of millions of jobs in emerging nations have been the direct result of outsourcing and offshoring decisions. At the same time, many people in the developed world have lost their jobs because a company has been able to find a cheaper alternative. Featuring contributions from scholars in eleven different countries, this book was the first to examine the theory and practice of outsourcing and offshoring simultaneously. It includes studies of a variety of different industries, including pharmaceuticals, automobiles, medical records, appliances, human resource management, and telecommunications.

The Handbook of Global Outsourcing and Offshoring 3rd edition Ilan Oshri, Julia Kotlarsky, Leslie P. Willcocks, 2015-01-23. Now in its third edition, this is the only outsourcing and offshoring book to offer a broad but coherent guide to the strategy, operations, and management of ITO and BPO outsourcing and offshoring, from how to source new relationships to managing business processes in a national and global context.

The Handbook of Global Outsourcing and Offshoring Ilan Oshri, Julia Kotlarsky, Leslie P. Willcocks, 2022-11-10. Global sourcing is a complex area and one that managers must get to grips with as business investment in outsourcing continues to climb. This book provides invaluable guidance for the reader, walking them through the fundamentals of global sourcing to very recent trends, including intelligent automation, cloud services, and crowdsourcing. Replete with key examples and cases, it allows students and managers alike to relate academic theory to practice, acting as a roadmap to a rapidly evolving field. For the last decade, the authors have studied the full spectrum of activities involved in global sourcing from both client, supplier, and advisory viewpoints. Their research has shown that while more firms engage in global sourcing activities, many of them are still struggling to extract value from sourcing relationships. While past research has produced numerous practical frameworks regarding the management of global sourcing of services, little of this insight has been put into practice. This book addresses such shortcomings by exploring the impact of theory on practice. It is important reading for any academic student or practitioner concerned with global sourcing, either from the client or supplier perspective.

This book offers a broad perspective on issues relating to the sourcing of systems and business processes in a national and global context, examining the client's and the vendor's involvement in sourcing relationships by putting the emphasis on the capabilities that each side should develop as a result of their interactions with each other.

strategies of leading firms global retailers branded marketers and brand name manufacturers and considers the conceptualisation of jobs in the global economy not by their location in particular industries or countries but by their role in global value chains The author argues that given the special features of global value chains there is a need to reconsider the contemporary notions of global corporate social responsibility and private as well as public governance *Outsourcing, Offshoring and the United States Office Market* Tanya M. Topolewski, Massachusetts Institute of Technology. Department of Urban Studies and Planning, 2004 There is intense debate among industry analysts and scholars over potential job losses caused by offshoring The real estate industry has been grappling to understanding the implications of these numbers as some have speculated that the projected job losses seem to translate into significantly lower demand for US office space Professional service firms are major users of office space and these firms are increasingly dependent on IT in nearly every aspect of their business Due to its technical nature and expense these industries routinely outsource and or offshore both major categories of IT work application services AO and business process BPO To explore how IT outsourcing and offshoring is affecting the US office market this work examined three professional services industries high tech manufacturing service and financial services aggressive adopters of IT and legal services a non aggressive adopter of IT Through a review of relevant research and structured interviews with eighteen companies this thesis examined IT outsourcing and offshoring activities with respect to three areas labor force access company portfolios and workspace utilization design Industry analysts observe that most firms do not yet have global outsourcing strategies in place but they need to This work concludes that firms outsourcing and offshoring activities vary across and within industries in relation to labor access and company work place portfolios High skill labor that can create innovative services drives high tech manufacturing firms to access IT labor worldwide while in financial services firms cost as well as innovation drives their global strategy In complete contrast legal services firms are cost driven but not dependent on innovation to provide their services and therefore do not outsource or offshore IT From a company portfolio standpoint while client location will always bind certain companies to particular locations and markets IT outsourcing and offshoring may make where they locate more flexible However in contrast to the direct relationships between IT outsourcing and offshoring and labor access and portfolio strategies evolutions in workplace strategies across firms including support of mobile work forces increases in space efficiency new communication strategies and work area obsolescence appear to be more related to firm innovation and the integration of technological breakthroughs
