**Michael Hoelscher**

## **Global Swing States And The Non Proliferation Order:**

**Global Swing States and the Non-proliferation Order** Megan Garcia, 2012 Brazil India Indonesia and Turkey are now making critical decisions about how to orient themselves to increase their influence in world affairs This is especially true regarding the intertwined issues of nuclear non proliferation nuclear disarmament and nuclear energy issues of practical and symbolic importance to each of these four countries There is currently a disconnect between the proliferation concerns of many Western countries and the more immediate concerns of these nations Western countries have traditionally defined the terms of the nonproliferation and disarmament debate and driven the accompanying agenda To move beyond this pattern the model of engagement will have to shift

**Great Powers and Geopolitics** Aharon Klieman, 2015-04-02 This book presents the theoretical historical comparative political framework needed to fully grasp the truly dynamic nature of 21st century global affairs The author provides a realistic assessment of the shift from U S predominance to a new mix of counterbalancing rival middle tier and assertive regional powers while highlighting those geopolitical zones of contention most critical for future international stability The book will appeal to scholars and policy makers interested in understanding the contours of the emerging world order and in identifying its principal shapers and leading political actors

**Accommodating Rising Powers** T. V. Paul, 2016-03-07 As the world enters the third decade of the twenty first century far reaching changes are likely to occur China Russia India and Brazil and perhaps others are likely to emerge as contenders for global leadership roles War as a system changing mechanism is unimaginable given that it would escalate into nuclear conflict and the destruction of the planet It is therefore essential that policymakers in established as well as rising states devise strategies to allow transitions without resorting to war but dominant theories of International Relations contend that major changes in the system are generally possible only through violent conflict This volume asks whether peaceful accommodation of rising powers is possible in the changed international context especially against the backdrop of intensified globalization With the aid of historic cases it argues that peaceful change is possible through effective long term strategies on the part of both status quo and rising powers

India and the European Union in a Turbulent World Rajendra K. Jain, 2020-07-16 The book examines how the European Union which in the past had tended to be seen by India as an undervalued partner is now increasingly part of most conversations in fields like the economy technology standards best practices development defence and security The book shows that the renewed focus on Europe is the result of changing geopolitics India s own priorities Europe s growing relevance in the post Brexit era China s expanding footprint in the continent and the search for alternatives to the loss of the UK as the gateway to Europe The

uncertainty inherent in the Brexit process and with the UK ceasing having ceased to be the traditional gateway to Europe India has been compelled to revisit re examine and rethink its own policies towards Europe and search for alternatives to Britain

*Iran* Anoushiravan Ehteshami, 2017-02-03 Having been ruled more or less continuously by a range of monarchical dynasties for three millennia the end of the monarchy in Iran was relatively sudden taking place in two short years Since then Iran has gone through tumultuous change yet is still apparently caught in a cycle of transition Iran has now created a complex but unique and non transferrable system of government but the question to be asked is whether the Islamic republic has lived up to its founding expectations serving the Iranian people and helping them to realize their aspirations This book is the first comprehensive analytical study of the forces which have been shaping and changing modern Iran and its relations with the rest of the world It looks at the roots of the 1979 revolution and the forces unleashed during the modernization process under the Pahlavi monarchy Applying a range of theoretical approaches to understanding the Islamic republic s neo authoritarian political system Anoushiravan Ehteshami reflects on how the country s new elite emerged and how these new political forces have changed Iran the stresses on its political system the forces shaping the country s political economy and the Islamic republic s international relations As some of Iran s leaders appear to crave permanent revolution as their means of staying in power this book argues that the struggle for the soul of the Islamic Republic has mired the country in a cycle of change Constant reform and transition The republic finds itself stuck in transition Written in a clear and insightful manner this book provides an unparalleled analysis of the Islamic Republic of Iran as a major regional actor and gives fresh insights into the political workings of the world s only Shia and revolutionary Islamic republic It will be of great importance to students and scholars of Middle East Politics and International Relations as well as the policy community whose gaze is never too far from this unique country
