Global Entrepreneurship and Development Index 2014 Zoltan J. Acs, László Szerb, Erkkó Autio, 2015-03-11 This volume captures the context features of entrepreneurship and fills a gap in the measurement of development Building on recent advances in entrepreneurship and economic development the authors have created an index that offers a measure of the quality of the business formation process in 120 of the most important countries in the world The authors expertly capture the contextual feature of entrepreneurship by focusing on entrepreneurial attitudes entrepreneurial abilities and entrepreneurial aspirations The data and their contribution to the business formation process are supported by three decades of research into entrepreneurship across a host of countries The Global Entrepreneurship and Development Index is a construction of individual and institutional measures that integrates 31 variables from various data sources into 15 pillars three sub indexes and a super index The relationship between entrepreneurship and economic development appears to be more or less mildly S shaped The findings suggest moving away from simple measures of entrepreneurship across countries illustrating a U shaped or L shaped relationship to more complex measures which are positively related to development The model has important implications for development policy This unique book will be invaluable for researchers policymakers and entrepreneurs keen to expand their understanding of entrepreneurship and development

Global Entrepreneurship and Development Index 2015 Zoltan J. Acs, László Szerb, Erkkó Autio, 2015-11-27 This volume provides a detailed look at the entrepreneurial ecosystem of different nations by combining individual data with institutional components The composite index presented in this book the Global Entrepreneurship Index GEI aims to measure the quality and scale of the entrepreneurial process in 130 countries around the world The authors have developed a system that links institutions and agents through a National Entrepreneurial System ecosystem in which each biotic and abiotic component is reinforced by the other at a country level The enclosed data from both individual and country level institutions provides policymakers a tool for understanding the entrepreneurial strengths and weaknesses of their respective economies thereby enabling the implementation of policies that foster productive entrepreneurship Distinct from both output based entrepreneurship indexes i e new firm counts and process based indexes i e comparisons of policies and regulations the GEI is designed to profile national systems of entrepreneurship The GEI is a construction of individual and institutional measures that integrates 31 variables from various data sources into 14 pillars three sub indexes and a super index The relationship between entrepreneurship and economic development appears to be more or less mildly S shaped The findings suggest moving away from simple measures of entrepreneurship across countries illustrating a U shaped or L shaped relationship to more complex measures which are positively related to development The Index also does not focus exclusively on high growth entrepreneurship it also considers the characteristics of entrepreneurship that enhance productivity innovation market expansion being growth oriented and having an international outlook Moreover because entrepreneurship can have both

economic and social consequences for the individual the GEI captures the dynamic institutionally embedded interactions between the individual level attitudes abilities and aspirations that drive productive entrepreneurship This unique book will be invaluable for researchers policymakers and entrepreneurs keen to expand their understanding of entrepreneurship and development

*Global Entrepreneurship and Development Index 2018* Zoltán J. Ács,László Szerb,Esteban Lafuente,Ainsley Lloyd,2018-11-27 This brief presents a detailed look at the entrepreneurial ecosystem of nations around the world by combining individual data with institutional components Presenting data from the 2018 Global Entrepreneurship and Development Index GEDI which measures the quality and scale of entrepreneurial process from 137 countries world wide this book provides a rich understanding of entrepreneurship and a more precise means to measure it The novelty of the GEDI 2018 edition is the examination of the connection between the GEDI score and the computed total factor productivity TFP values The Global Entrepreneurship and Development Index is an annual index composite indicator that measures the health of the entrepreneurship ecosystems in a given country The authors have identified 14 components or pillars that are important for the health of entrepreneurial ecosystems identified data to capture each and used this data to calculate three levels of scores for a given country the overall GEDI score scores for Individuals and Institutions and pillar level scores which measure the quality of each of the 14 components

**Global Entrepreneurship and Development Index 2016** Zoltan Acs,László Szerb,Erkko Autio,2017-10-11 This brief captures the contextual features of entrepreneurship by measuring entrepreneurial attitudes abilities and aspirations at both the individual and country level Featuring data from the 2016 Global Entrepreneurship and Development Index GEDI which measures the quality and scale of the entrepreneurial process in 133 countries around the world this book provides a tool to help policymakers and governments harness the power of entrepreneurship to address some of the economic challenges faced at the country level In addition to the yearly data and comparisons this edition also explores the relationship between entrepreneurship and other measures of development Distinct from both output based entrepreneurship indexes i e new firm counts and process based indexes i e comparisons of policies and regulations the GEDI is designed to profile national systems of entrepreneurship The Index does not simply count new firm registrations nor is it an exercise of policy benchmarking It also does not focus exclusively on high growth entrepreneurship it considers the characteristics of entrepreneurship that enhance productivity such as innovation market expansion globalization and growth potential Finally recognizing that entrepreneurship has a different impact in different economic and institutional contexts the GEDI combines individual level data with data that describes national institutions as well as economic and demographic structures to provide an institutionally embedded view of the drivers of productive entrepreneurship

**Global Entrepreneurship and Development Index 2017** Zoltan J. Acs,László Szerb,Ainsley Lloyd,2017-09-14 This brief presents a detailed look at the entrepreneurial ecosystem of nations around the world by combining individual data with institutional components Presenting data from the 2017 Global Entrepreneurship and

Development Index GEDI which measures the quality and scale of entrepreneurial process from 137 countries world wide this book provides a rich understanding of entrepreneurship and a more precise means to measure it In addition to yearly data and comparison this 2017 edition also explores the digital entrepreneurial ecosystem and provides a detailed analysis of two measurements of entrepreneurship the GEDI and the Total Early Stage Entrepreneurial Activity TEA measure Whereas developed countries will be challenged to increase their economic productivity to sustain current standards of living as their populations rapidly age developing economies will need to integrate more than two billion young adults into the world economy by 2050 How can more than one billion jobs be created in the developing world within this timeframe especially in the least developed countries where poverty and massive unemployment are already dominant facts of economic life How can we measure monitor and build the ecosystems to produce such growth The GEDI is designed to profile national systems of entrepreneurship It links institutions and agents through a National Entrepreneurial System ecosystem in which each biotic and abiotic component is reinforced by the other at the country level The resulting data gives policymakers a tool for understanding the entrepreneurial strengths and weaknesses of their countries economies thereby enabling them to implement policies that foster productive entrepreneurship The GEDI also helps governments harness the power of entrepreneurship to add these types of challenges

**The Digital Platform Economy Index 2020** László Szerb,Eva Somogyine Komlosi,Zoltan J. Acs,Esteban Lafuente,Abraham K. Song,2022-01-03 This book presents the 2020 Digital Platform Economy Index DPE Index The DPE Index integrates two separate but related literatures on ecosystems namely the digital ecosystem and the entrepreneurial ecosystem This new framework situates digital entrepreneurship within the broader context of users platforms and institutions such that two biotic entities users and agents actuate individual agency and two abiotic components digital infrastructure and digital platforms form the external environment The DPE Index framework includes 12 pillars that integrate the digital and the entrepreneurship ecosystems Here the authors report on the DPE Index the four sub indices and the 12 pillar values for 116 countries as well as provide a cluster analysis based on the 12 pillars Entrepreneurship in Africa ,2017-09-25 Chapters in this book contribute to our understanding of the theory structure and practice of entrepreneurship in diverse African countries Case studies examined include African multinational banks and businesses female entrepreneurs culture and entrepreneurship finance and entrepreneurship and SMEs

Entrepreneurship and Social Innovation for Sustainability Sohel Rana,Lily Kiminami,Shinichi Furuzawa,2022-11-04 This book aims to assess the roles of entrepreneurship and social innovation for socio cultural changes It also evaluates farmers performance in disaster risk management at a community level toward sustainable regional development in a rural haor region of Bangladesh To achieve the purpose of the research both a qualitative method Trajectory Equifinality Modeling TEM and a quantitative method Structural Equation Modeling SEM are introduced based on the results of case studies on local entrepreneurs interview and focus group discussions with stakeholders and questionnaire surveys of farm households First

the results clarify that social capital is critically important both for male and female entrepreneurs in the haor region and that education is more important to women for empowerment and technology adoption in the entrepreneurial ecosystem in the haor region of Bangladesh. In addition, it makes clear that the Common Interest Group approach plays a role for women's empowerment in the target region. Furthermore, it identifies the multi-causal relationships among the factors affecting farm households' performance in disaster risk management at the community level. This book helps readers to understand regional development through social and cultural transformation in a rural community where poverty and gender discrimination are path-dependent problems.

**Global Entrepreneurship Index 2015** Zoltan Acs, László Szerb, Erkkó Autio, 2014-09-20. The Global Entrepreneurship Index both captures the context features of entrepreneurship and fills a gap in the measurement of development. Building on recent advances in entrepreneurship and economic development, the authors have created an index that offers a measure of the quality of the business formation process in 130 of the most important countries in the world. The authors expertly capture the contextual feature of entrepreneurship by focusing on entrepreneurial attitudes, entrepreneurial abilities and entrepreneurial aspirations. The data and their contribution to the business formation process are supported by three decades of research into entrepreneurship across a host of countries. The unique index construction of individual and institutional measures integrates 31 variables from various data sources into 14 pillars, three sub-indexes and a super index. The relationship between entrepreneurship and economic development appears to be more or less mildly S-shaped. The findings suggest moving away from simple measures of entrepreneurship across countries, illustrating a U-shaped or L-shaped relationship to more complex measures which are positively related to development. The model has important implications for development policy. This unique book will be invaluable for researchers, policymakers and entrepreneurs keen to expand their understanding of entrepreneurship and development.

**The Global Entrepreneurship Index (GEINDEX)** Zoltán J. Ács, László Szerb, 2009. The Global Entrepreneurship Index contributes to our understanding of economic development by constructing an index, GEINDEX, that examines the essence of the contextual features of entrepreneurship and fills a gap in the measure of development.

Corruption, Entrepreneurship, and Social Welfare Farzana Chowdhury, Sameeksha Desai, David B. Audretsch, 2017-09-23 This book examines the complex relationship between corruption and entrepreneurship in countries of varying levels of economic development The authors explore the ways in which social welfare policies have changed in current economic and political environments as well as key challenges faced by the welfare policies In addition this book addresses three key questions with regard to the impact of corruption on institutions and social welfare Is corruption an additional burden in extensive regulatory environment on different types of entrepreneurship necessity entrepreneurship opportunity entrepreneurship total entrepreneurial activity self employment and newly registered firms Is corruption helpful for entrepreneurs who have aspiration to operate outside their home country border in highly regulated environment How does corruption affect income distribution generated through entrepreneurial activity Entrepreneurship is an important factor for local and national economies as it generates employment and income that are crucial for economic development

Corruption can significantly influence the nature of decisions made by entrepreneurs with profound effects on business creation institutional development and economic performance For example an entrepreneur with resources and networks might be able to influence the regulatory agencies to overlook violations expedite permits or bribe corrupt program administrators to violate the rules of distribution exacerbating income inequality and obstructing economic growth and development While corruption is not a new phenomenon the current globalized economy has introduced trade into the corruption question as globalization puts pressure on countries to open borders to attract investments and gain a competitive advantage However many country level institutions do not always change as fast as the economic activity across borders which can encourage corruption in order to bypass inefficient regulations and to successfully engage in entrepreneurship The authors of the book examine this phenomenon Featuring policy implications and case studies this book will appeal to graduate students academics professionals practitioners and researchers in entrepreneurship international business and public policy
