Global Public Health Vigilance Creating A World On Alert:

Global Public Health Vigilance Lorna Weir, Eric Mykhalovskiy, 2010-05-17 Describes and analyzes the transformations in global mechanisms for monitoring infectious disease outbreaks that have occurred since the mid 1990s This book examines early warning outbreak detection which operates electronically through the Internet to identify infectious disease outbreaks that may lead to international health emergencies *Routledge Handbook of Global Health Security* Simon Rushton, Jeremy Youde, 2014-08-07 This new Handbook presents an overview of cutting edge research in the growing field of global health security Over the past decade the study of global health and its interconnection with security has become a prominent and rapidly growing field of research Ongoing debates question whether health and security should be linked which if any health issues should be treated as security threats what should be done to address health security threats and the positive and negative consequences of securitizing health In academic and policy terms the health security field is a timely and dynamic one and this handbook will be the first work comprehensively to address this agenda Bringing together the leading experts and commentators on health security issues from across the world the volume comprises original and cutting edge essays addressing the key issues in the field and also highlighting currently neglected avenues for future research The book intends to provide an accessible yet sophisticated introduction to the key topics and debates and is organised into four key parts Health Securities the fundamental conceptual issues historical links between health and security and the various ways of conceptualising health as a security issue Threats those health issues which have been most frequently discussed in security terms Responses the wide range of contemporary security driven responses to health threats Controversies the securitization of health its impact on rights and justice and the potential distortion of the global health agenda This book will be of great interest to students of global health security public health critical security studies and International Relations in general **The Politics of Surveillance and Response to Disease Outbreaks** Sara E. Davies, Jeremy R. Youde, 2016-02-24 The capacity to conduct international disease outbreak surveillance and share information about outbreaks quickly has empowered both State and Non State Actors to take an active role in stopping the spread of disease by generating new technical means to identify potential pandemics through the creation of shared reporting platforms Despite all the rhetoric about the importance of infectious disease surveillance the concept itself has received relatively little critical attention from academics practitioners and policymakers This book asks leading contributors in the field to engage with five key issues attached to international disease outbreak surveillance transparency local engagement practical needs integration and appeal to illuminate the political effect of these technologies on those who use surveillance those who respond to surveillance and those being monitored *Security and Public Health* Simon Rushton, 2019-05-29 For most Western governments defending against the threat of infectious disease is now an accepted security priority Deciding what resources and policies to put in place to protect populations from pandemics however

involves difficult political choices How can we get these decisions right And what are we prepared to sacrifice to achieve better health security In this book Simon Rushton explores the politics of pandemics in the contemporary world Looking back over three decades of public health he traces national and international efforts to tackle infectious disease focusing in depth on three core areas in which securitization has been particularly successful rapidly spreading pandemic diseases HIV AIDS and man made pathogenic threats such as biological weapons Three central problems raised by common responses to disease as a security threat are then examined the impact upon individuals and civil liberties the tendency to treat the symptoms and not the underlying causes of disease outbreaks and the limited range of diseases deemed worthy of global attention and action Arguing against a tendency to treat global health security as a technical challenge the book stresses the need for a vibrant and even confrontational political engagement around the implications of securitizing public health *Geneva Health Forum 2020 Poster Book* Antoine Flahault,Antoine Geissbuhler,Nicole Rosset,2022-01-06 The Geneva Health Forum is the forum that brings together key actors of Global Health Created in 2006 and held every two years ever since it is organized by the Geneva University Hospitals HUG and the University of Geneva in partnership with 30 global health organizations Building on the dynamic of International Geneva the Geneva Health Forum is one of the most important international global health conferences The overall objective of the Geneva Health Forum is to contribute to the improvement of health and access to health care in the world To achieve this goal it aims to give visibility to innovative field experiences and to establish a critical and constructive dialogue between global health actors from different sectors as well as to foster collaborations between them At each edition the Geneva Health Forum gives an important place to the presentation of research projects Research whether carried out by students or established researchers contributes to innovation and new practices in access to care The synthesis of research results in the form of a poster remains a quality exercise Electronic dissemination offers new opportunities to meet a wider audience Favoring a multidisciplinary approach the GHF is open to all professions working in the health field From 16 to 18 November 2020 the eighth edition of the Geneva Health Forum which took place in the difficult context of the Covid 19 pandemic hosted 165 posters The present collection offers through 65 posters a wide range of topics discussed We look forward to seeing you at the next edition of the GHF which will take place from 3 to 5 May 2022 **Public Health Reports** ,1965 International Journal of Public Health ,1921
