Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars Testing Regimes, Accountabilities and Education Policy Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD's PISA and IEA's TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation's human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the Journal of Education Policy **Handbook of International and Cross-Cultural Leadership Research Processes** Yulia Tolstikov-Mast, Franziska Bieri, Jennie L. Walker, 2021-11-29 An invaluable contribution to the area of leadership studies the Handbook of International and Cross Cultural Leadership Research Processes Perspectives Practice Instruction brings together renowned authors with diverse cultural academic and practitioner backgrounds to provide a comprehensive overview and analysis of all stages of the research process The handbook centers around authors' international research reflections and experiences with chapters that reflect and analyze various research experiences in order to help readers learn about the integrity of each stage of the international leadership research process with examples and discussions Part I introduces philosophical traditions of the leadership field and discusses how established leadership and followership theories and approaches sometimes fail to capture leadership realities of different cultures and societies Part II focuses on methodological challenges and opportunities Scholars share insights on their research practices in different stages of international and cross cultural studies Part III is forward looking in preparing readers to respond to complex realities of the leadership field teaching learning publishing and applying international and cross cultural leadership research standards with integrity The unifying thread amongst all the chapters is a shared intent to build knowledge of diverse and evolving leadership practices and phenomena across cultures and societies The handbook is an excellent resource for a broad audience including scholars across disciplines and fields
