

The background of the book cover is a composite image. The top half shows a view of the Earth from space, with blue oceans and white clouds. The bottom half is split into two vertical panels. The left panel shows three stalks of green wheat against a light blue background. The right panel shows a dark, silhouetted industrial facility with smokestacks emitting thick, dark smoke into a sky that is a mix of orange and dark grey, suggesting a sunset or a fire.

Globalization, Environmental Law, and Sustainable Development in the Global South (Entire Book in Open Access). Paolo Davide Farah, Kirk W. Junker, 2023 Globalization is a word with many meanings Some people say globalization is responsible for having lifted millions of people out of poverty over the past decades Other people say that globalization is neocolonialism All will agree that the processes that accompany globalization have had tremendous impacts on the environment Commodification of the environment along with environmental degradation have led to an almost universal awareness of the negative effects of such crises as disrupted climate The conservation and restoration of the environment as well as the protection of biodiversity are essential for human life including its economic components The international community has responded to the challenge by shifting away from the Brundtland Commission's intergenerational concept of development which meets the needs of current generations without compromising the ability of future generations to meet their own needs to equating development with economic development under the New York Convention and reserving a third and separate pillar for economics over and against social concern and the environment However promising the concepts sustainable development and sustainability may have been they have become overused and meaningless Like worn out coins they became just placeholders To re inscribe meaning in the metal of sustainable development the authors in this book examine environmental problems caused facilitated or exacerbated by globalization as seen from the perspectives of the Global South and emerging economies Investments trade and technological advances are key driving forces of transition in these countries The economic development component also known as green growth policies may be preferred by globalizing forces which also regard it as most suitable to cope with climate disruption for example With the globalization of economics comes some aspects of the globalization of law The globalization of environmental law that is currently under formation in the Global South addresses the integration of the ecological and economic components by analyzing the contribution of emerging and developing economies Sometimes environmental law is part of the solutions sometimes environmental law is part of the problems In this book the terms Global South and emerging economies are included as alternative conceptualizations to the developed and developing countries But this alternative conceptualization itself is a divide that enables globalization In the chapters of this book the perspectives of the Global South and emerging economies are presented by lawyers from Brazil Ethiopia India Mongolia Nigeria and St Vincent and the Grenadines as well as from the European states of France Georgia Germany and Slovakia The authors are natives of either emerging economies or of the Global South or work extensively in those regions All of the book's themes are mentioned in the title globalization environmental law sustainable development the Global South implementation and challenges [Value-Creating Global](#)

da Cunha Renata Welinski da Silva Seabra Golda A Edwin Thomas Kaydor Tehmina Khan Amanda Lange Salvia Paula Lopes Petra Schneider Pinar G k in zuyar **Globalisation, Environment and Social Justice** Manish Verma, 2018-07-06 This volume provides a comprehensive account of the connections between globalisation environment and social justice It examines varied dimensions of environmental sustainability the adverse impact of globalisation on environment and its consequences for poverty unemployment and displacement the impacts on marginalised sections such as scheduled castes and tribes and women and policy frameworks for ensuring environmental sustainability and social justice The chapters build on detailed case studies from different parts of the world and deal with critical environmental issues such as global emissions climate change sustainable development green politics species protection water governance waste management food production and governance besides education inclusivity and human rights Presenting a range of topics alongside new perspectives and discourses this interdisciplinary book will be useful to students and researchers of political studies sociology and environmental studies as well as policymakers and those working in the government and civil society organisations **From the Earth Summit to Local Agenda 21** William M. Lafferty, Katarina Eckerberg, 2013-11-05 This collection of in depth case studies emphasizes the diversity and inventiveness of local initiatives since the Rio Earth Summit within different national settings From the Earth Summit to Local Agenda 21 offers a realistic counterpoint to the official monitoring and assessment procedures of national governments and international bodies It highlights the problems of assessment and policy evaluation and clearly sets out the policy stages necessary for more effective realization of Local Agenda 21 objectives **The Political Economy of Environment and Development in a Globalised World** Darley Jose Kjosavik, Paul Vedeld, 2011 This book is a critical exploration of the theoretical and thematic frontiers of environment and development studies in the context of globalisation The edited volume offers important theoretical interdisciplinary perspectives and insights on the political economy of environment and development The theoretical frontiers in environment and development studies focusing on concepts and theories in relation to sustainable development social justice capabilities freedom scarcity progress post development and environment and environmental governance are explored The book offers an exposition of resource appropriation in the emerging global political economy that draws on primary and secondary material from different geographical areas The main message in this volume is that the globalised governance regime led by the North sets the twin agenda of development and environmental management ignoring the contradictory nature of the two as the nature environment of the South are increasingly available to the North to subsidise development and manage environment in the North The book also extends this analysis to the globalised nature of peace and development in national states and presents experiences from Sri Lanka and Afghanistan The liberal peace building project located within the globalised regime has contributed to new conflicts over resources and power in the South as the resource itself is subject to the increasing demands of global particularly corporate capital The book is a call to academia policy makers and activists to

pay serious attention to these contradictions in the theories policies and practices of development The book is in honour of Nadarajah Shanmugaratnam and draws on his work on the contradiction interdependence dialectic relation between capital and nature environment
