

PROS AND CONS OF GLOBALIZATION

... TODAY, GLOBALIZATION IS being challenged around the world. There is discontent with globalization, and rightfully so. Globalization can be a force for good: the globalization of ideas about democracy and of civil society have changed the way people think; while global political movements have led to debt relief and the treaty on landmines. Globalization has helped hundreds of millions of people attain higher standards of living, beyond what they, or most economists, thought imaginable but a short while ago. The globalization of the economy has benefited countries that took advantage of it by seeking new markets for their exports and by welcoming foreign investment. Even so, the countries that have benefited the most have been those that took charge of their own destiny and recognized the role government can play in development rather than relying on the notion of a self-regulated market that would fix its own problems.

But for millions of people, globalization has not worked. Many have actually been made worse off, as they have seen their jobs destroyed and their lives become more insecure. They have felt increasingly powerless against forces beyond their control. They have seen their democracies undermined, their cultures eroded.

If globalization continues to be conducted in the way that it has been in the past, if we continue to fail to learn from our mistakes, globalization will not only not succeed in promoting development but will continue to create poverty and instability. Without reform, the backlash that has already started will mount and discontent with globalization will grow.

What is one positive change from globalization?

What is one negative change from globalization?

... China's spectacular economic progress has not come without costs. The country's environment has suffered enormously as factories pop up everywhere and 2,000 new cars hit Beijing roads each day. Pollution in Chinese cities is among the world's worst, with air so contaminated that children are often warned not to play outside.

The working conditions for many Chinese are also a concern. Millions of people crowd into cities for factory jobs making the shirts and sneakers and cellphones that the rest of the world buys. Many of them work 12 hours a day, 7 days a week, earning as little as \$150 a month...
