Ethics and Business Bart Wernaart, 2021-05-26 Ethics in business is not a new topic and has been intensely discussed since the emergence of the so called limited companies However privatization technological and digital innovation changes in moral perception economic and financial crises and globalization stir a more recent debate on how companies should behave in our societies This book starts from the position that ethics in business should imply an open debate on norms and values using a sound methodology to get there Ethics should cross borders not only the borders of a country but also the borders of someone's moral imagination Ethics should not only be about harmony but also about conflict and how to deal with that Ethics should be realistic and well substantiated by academic research Ethics should be used to understand the complexity of the world and the challenges companies struggle with on various levels Therefore this book is composed of three parts in which ethics is discussed at different levels In part one we discuss ethics at the level of the individual In part two we discuss ethics and business In the third part ethics is discussed in the context of a globalized world In each chapter we discuss the ethical complications of each topic from various and preferably opposing perspectives Each perspective is methodologically and academically substantiated Each chapter ends with an extensive literature list in which the original sources are listed for further reading Furthermore at the end of each chapter a summary is written in which the most important definitions and viewpoints are highlighted The frequent use of colorful and bold examples make this an accessible read for bachelor and master students at business schools and professionals in international business

Armed Organizations and Political Elites in Civil Wars Erwin van Veen, 2024-06-03 This book analyses under what conditions and with what developmental effects armed organizations shift their coercive profile during civil wars with a focus on the recent conflicts in Syria and Iraq The work begins with an operationalisation of the term political settlement focusing on how power is organized in fragile and conflict affected countries and then uses this operationalization to analyse the political settlements of contemporary Syria and Iraq including their breakdown and

transformation during recent civil wars of 2011 today in Syria and 2014-17 in Iraq. It subsequently examines why and how elite factions have used armed organizations in times of conflict. This approach links an understanding of the broad evolution of power relations at the national level with the specific effects of the use of armed organizations on such relations. It argues for a shift from assigning fixed labels to armed organizations during civil wars to studying their coercive profile in a dynamic fashion, i.e. how armed organizations behave in terms of their use of threats and coercive force. The book introduces five profiles of coercive behaviour that demonstrate how the same organization can behave very differently at various points in time. One of these, the hybrid coercive profile, fills a gap in the existing civil war typology of organized armed violence by opening up the possibility of elite factions deliberately combining collaborative and competitive modes of behaviour. As an evidence base, the book provides in-depth analysis of the origins, evolution, and operations of four armed organizations that have acted under a hybrid coercive profile during the Syrian and Iraqi civil wars: the Syrian Kurdish People's Defence Forces, the Eagles of the Whirlwind of the Syrian Social Nationalist Party, the Iraqi Kurdish Peshmerga, and the Badr Organization. By connecting the concepts of political settlement and civil war and applying them to specific armed organizations operating in Syria and Iraq, the book offers new insights into this nexus. This book will be of much interest to students of civil wars, conflict studies, Middle Eastern Studies, and International Relations.

Comparative Religious Ethics Darrell J. Fasching, Dell deChant, David M. Lantigua, 2011-05-02. This popular textbook has been thoroughly revised and updated to reflect recent global developments whilst retaining its unique and compelling narrative style approach. A thoroughly revised and expanded new edition of this popular textbook yet retains the unique narrative style approach which has proved so successful with students. Considers the ways in which ancient stories from diverse religions such as the Bhagavad Gita and the lives of Jesus and Buddha have provided ethical orientation in the modern world. Updated to reflect recent discussions on globalization and its influence on cross-cultural and comparative ethics, economic dimensions to ethics, Gandhian traditions, and global ethics in an age of terrorism. Expands coverage of Asian religions, quest narratives, the religious and philosophical approach to ethics in the West, and considers Chinese influences on Thich Nhat Hanh's Zen Buddhism and Augustine's Confessions. Accompanied by an instructor's manual, coming soon, see www.wiley.com/go/fasching which shows how to use the book in conjunction with contemporary films.

VOJKO STRAHOVNIK., *The Coming Jesus and the Anthropocene* Ryan LaMothe, 2024-02-22. Melting glaciers and icecaps, massive forest fires, enormous storms, extensive and prolonged flooding, and desertification of large tracts of land are realities we currently face and will continue to struggle with as a result of climate change. Our climate crisis invites, if not demands, a critical evaluation of our political, religious, economic, and cultural narratives and rituals that give rise to our ways of relating to one another, to other species, and to planet Earth. This book argues that the climate emergency exposes deep problematic

roots of Western religious and political paradigms and apparatuses that undergird ideas of and methods for human flourishing In particular Western religious and political philosophies have produced and maintained a radical rift between human beings and other species as well as beliefs about human dominion over other species and the earth These ideas and practices are responsible for the colonization of Nature and for climate change Understanding these sources invites a radical reimagining of our religious ideas and practices Specifically this book proposes a coming Jesus a form of life that traverses the rift while denying human and divine dominion for the sake of recognizing and respecting the singularities and flourishing of all species
