Globalisation And Ecological Integrity In Science And International Law:

Globalisation and Ecological Integrity in Science and International Law Colin Soskolne, Laura Westra, Klaus Bosselmann, 2011-01-18 This volume returns to one of the major themes of the Global Ecological Integrity Group the interface between integrity as a scientific concept and a number of important issues in ethics international law and public health The main scholars who have worked on these topics over the years return to re examine these dimensions from the viewpoint of global governance [Globalisation and Ecological Integrity in Science and International Law](#) Klaus Bosselmann, Laura Westra, Colin Lionel Soskolne, 2011 **The Philosophical Foundations of Ecological Civilization** Arran Gare, 2016-08-05 The global ecological crisis is the greatest challenge humanity has ever had to confront and humanity is failing The triumph of the neo liberal agenda together with a debauched scientism has reduced nature and people to nothing but raw materials instruments and consumers to be efficiently managed in a global market dominated by corporate managers media moguls and technocrats The arts and the humanities have been devalued genuine science has been crippled and the quest for autonomy and democracy undermined The resultant trajectory towards global ecological destruction appears inexorable and neither governments nor environmental movements have significantly altered this or indeed seem able to *The Philosophical Foundations of Ecological Civilization* is a wide ranging and scholarly analysis of this failure This book reframes the dynamics of the debate beyond the discourses of economics politics and techno science Reviving natural philosophy to align science with the humanities it offers the categories required to reform our modes of existence and our institutions so that we augment rather than undermine the life of the ecosystems of which we are part From this philosophical foundation the author puts forth a manifesto for transforming our culture into one which could provide an effective global environmental movement and provide the foundations for a global ecological civilization [Ecological Integrity and Global Governance](#) Laura Westra, 2016-04-28 It is increasingly argued that a focus on environmental sustainability is fundamental to effective and equitable governance and ultimately for the good of mankind This book argues that in the face increasing environmental challenges it is essential to recognise the role that ecological integrity has played and must play in governance for environmental sustainability in order to ensure the future survival of life on earth Ecological integrity encompasses not only the necessity of respect for nature but also the human right to a sound and healthy environment The author shows that on this basis acceptance of its primacy in law and governance is key to a sustainable and equitable future for all The book presents a uniquely informed treatise on the term its origins evolution and position in current debates exploring the conflicts which have so far prevented its acceptance Written by a leading scholar on the subject this book provides the most in depth exposition of ecological integrity available to increase understanding of this crucial concept and encourage its adoption in governance and international law **Globalization and Sustainability - Ecological, Social and Cultural Perspectives** , 2024-10-23 This book Globalization and Sustainability Ecological Social and

Cultural Perspectives gives an interesting overview of the frontiers of scientific research in this practically important and scientifically interesting applied ecological research area. Globalization, Violence and World Governance Laura Westra, 2011-02-14. In this work Laura Westra draws our attention to the failure of international law to promote and protect the rights of society in the face of the ravages of neoliberal agendas in an era of globalization. This book outlines how international law is perhaps a misnomer and at its core there is a great distance between laws as they are written and laws as they are implemented.
