Deep Learning with Microsoft Cognitive Toolkit Quick Start Guide Willem Meints, 2019-03-28 Learn how to train popular deep learning architectures such as autoencoders convolutional and recurrent neural networks while discovering how you can use deep learning models in your software applications with Microsoft Cognitive Toolkit Key Features Understand the fundamentals of Microsoft Cognitive Toolkit and set up the development environment Train different types of neural networks using Cognitive Toolkit and deploy it to production Evaluate the performance of your models and improve your deep learning skills Book Description Cognitive Toolkit is a very popular and recently open sourced deep learning toolkit by Microsoft Cognitive Toolkit is used to train fast and effective deep learning models This book will be a quick introduction to using Cognitive Toolkit and will teach you how to train and validate different types of neural networks such as convolutional and recurrent neural networks This book will help you understand the basics of deep learning You will learn how to use Microsoft Cognitive Toolkit to build deep learning models and discover what makes this framework unique so that you know when to use it This book will be a quick no nonsense introduction to the library and will teach you how to train different types of neural networks such as convolutional neural networks recurrent neural networks autoencoders and more using Cognitive Toolkit Then we will look at two scenarios in which deep learning can be used to enhance human capabilities The book will also demonstrate how to evaluate your models performance to ensure it trains and runs smoothly and gives you the most accurate results Finally you will get a short overview of how Cognitive Toolkit fits in to a DevOps environment What you will learn Set up your deep learning environment for the Cognitive Toolkit on Windows and Linux Pre process and feed your data into neural networks Use neural networks to make efficient predictions and recommendations Train and deploy efficient neural networks such as CNN and RNN Detect problems in your neural network using TensorBoard Integrate Cognitive Toolkit with Azure ML Services for effective deep learning Who this book is for Data Scientists Machine learning developers AI developers who wish to train and deploy effective deep learning models using Microsoft CNTK will find this book to be useful Readers need to have experience in Python or similar object oriented language like C or Java

AI-Augmented Paralegal HEBooks, Tired of spending hours on repetitive legal tasks while AI powered tools reshape the profession faster than you can keep up The AI Augmented Paralegal cuts through the noise and gives you a clear practical roadmap to master AI tools that save time reduce errors and boost your value without needing a tech degree From automating document review to drafting smarter memos and streamlining workflows this book equips you with the real world skills to use AI confidently and ethically in your daily work No fluff No jargon Just actionable strategies for paralegals by a paralegal so you stay relevant efficient and ahead of the curve in today's AI driven legal world Your future in law isn't about resisting change it's about leading it

No-Code Artificial Intelligence Ambuj Agrawal, 2023-03-07 A

practical guide that will help you build AI and ML solutions faster with fewer efforts and no programming knowledge

KEY FEATURES Start your journey to become an AI expert today Learn how to build AI solutions to solve complex problems in your organization Get familiar with different No code AI tools and platforms

DESCRIPTION No Code Artificial Intelligence is a book that enables you to develop AI applications without any programming knowledge Authored by the founder of AICromo <https://aicromo.com> this book takes you through an array of examples that shows how to build AI solutions using No code AI tools The book starts by sharing insights on the evolution of No code AI and the different types of No code AI tools and platforms available in the market The book then helps you start building applications of Machine Learning in Finance Healthcare Sales and Cybersecurity It will also teach you to create AI applications to perform sales forecasting find fraudulent claims and detect diseases in plants Furthermore the book will show how to build Machine Learning models for a variety of use cases in image recognition video object recognition and data prediction After reading this book you will be able to build AI applications with ease

WHAT YOU WILL LEARN Use different No code AI tools such as AWS Sagemaker DataRobot and Google AutoML Learn how to create a Machine Learning model to predict housing prices Build Natural Language Processing NLP models for Healthcare information Identification Learn how to build an AI model to create targeted customer offerings Use traditional ways to perform AI implementation using programming languages and AI libraries

WHO THIS BOOK IS FOR This book is for anyone who wants to build an AI app without writing any code It is also helpful for current and aspiring AI and Machine Learning professionals who are looking to build automated intelligent and smart AI based solutions

Chatgpt and Other Generative AI Tools

Jochen Kuhn, Stefan Küchemann, Knut Neumann, Martina Rau, 2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies

Generative AI in Education

Ilaria Torre, Diego Zapata-Rivera, Chien-Sing Lee, Antonio Sarasa-Cabezuelo, Ioana Ghergulescu, Paul Libbrecht, 2024-12-24 In the field of education there is a growing interest in the use of Generative Artificial Intelligence to reshape the educational landscape Led by our esteemed Associate Editors Dr Zapata Rivera Prof Torre and Review Editors Profs Lee Sarasa Cabezuelo Libbrecht Dr Ghergulescu this editorial initiative aims to investigate the

transformative potential of Generative AI in various aspects of education By leveraging machine learning models these intelligent systems extract useful insights from vast amounts of data making them capable of delivering highly individualized content They can analyze a learner s proficiency level learning style and pace and then tailor the study material accordingly Whether a learner prefers visual aids textual content or interactive modules Generative AI can adapt its content generation strategies to meet distinct preferences and learners needs This ensures an elevated engagement level and enhanced comprehension highlighting its potential to transform traditional teaching methodologies

Rethinking Language Education in the Age of Generative AI Zhongfeng Tian,Chaoran Wang,2025-05-20 Rethinking Language Education in the Age of Generative AI bridges the gap between theory research and practice in AI and language education Through conceptual pieces empirical studies and practical applications this book provides critical insights and implications for reimagining language education in the age of generative AI The contributors explore a wide range of issues reflections and innovations in AI and language education across diverse contexts including English as a Second Language ESL English as a Foreign Language EFL foreign language learning postsecondary pathways programs for international students and language teacher education programs Topics examined include critical AI literacy GenAI informed second language teaching and assessment teacher and student perceptions tool development for language learning as well as ethical considerations policies and guidelines The book incorporates interdisciplinary perspectives such as L2 foreign language studies education and applied linguistics as well as global insights from countries like the United States Canada South Korea Thailand Indonesia and the Philippines This book is essential for students and researchers seeking to leverage AI to enhance language teaching and learning in innovative critical ethical and responsible ways
