Predictions about the world have the power to grip whole societies and shape the actions of many groups, whether working in politics, ecology, or religion. At the end of epochs and eras, humans tend to reflect on the shape of things to come. Most recently, fears about the millennium bug had thousands rushing to stock up on candles and food in the weeks before New Year's Eve. Concerns about the future have been expressed differently throughout history. This book explores the historical context surrounding various debates, decisions, and beliefs about the future in recent centuries. Religious, political, literary, and ecological visions of the future in America and Germany are addressed comparatively. In particular, scholars from the United States and Germany explore the meaning of eschatological and utopian thoughts pursued during the last three centuries and tackle subjects ranging from science fiction to religious radicalism, utopian social experiments, and visions of race relations. This book delves into the hopes and fears for the future that have shaped the past and will be of interest to comparative historians as well as to historians of Europe and the United States intrigued by the subject of utopias. *The Magna Carta of Humanity* Os Guinness, 2021-05-11. What kind of revolution brings true freedom to both society and the human soul? Cultural observer Os Guinness contrasts the secular French Revolution with the faith-led revolution of ancient Israel. Arguing that the story of Exodus is the richest vision for freedom in human history, his exploration charts the path to the future for America. *Ethical Monotheism, Past and Present* Wendell S. Dietrich, 2001. In the spirit of Dietrich's work, essays by colleagues and former students of the Brown University professor emeritus explore the boundaries of ethical monotheistic religion historically and as a constructive resource for contemporary religious and ethical thought. Ethical monotheism, the view that monotheistic religion developed toward the prophets' central concern with individual and corporate moral behavior, has dominated modern religious thought since Kant. Dietrich traced its development in Jewish and Christian contexts in his classic monograph. Cohen and Troeltsch and other works. c. Book News Inc.
