## **CHAPTER 1- INTRODUCTION**

**AIM:** we intend to show:

1 how the capacity for anticipatory representations broadens the human emotional repertoire

2 the usefulness of belief-goal analysis of emotions for doing justice to the complexity of human emotional experience, and for identifying important differences among emotions which belong to the same general family.

Although belief-goal analyses already exist in some form for several emotions, much work is still needed for identifying the distinguishing features of each of them. In our view, this task is best accomplished by an approach that focuses on families of related emotions, comparing them with their similar and understanding better its implications in terms of motivations and actual behaviour. Furthermore it can help account for possible transformations from one emotion to another.

Anticipated emotions(emotions that are object of anticipatory representations) and their motivational effect on goal-directed behaviour, have recently remarkable interest in the decision theory. In contrast we intend to analyse the whole spectrum of anticipation-based emotions. Is necessary to distinguish anticipated emotions,anticipatory emotions (those implying the anticipatory representation of some desired or undesired events) and invalidation-based emotions (those elicited by the invalidation of some anticipatory representation). We aim at providing a detailed analysis of specific, discrete anticipatory emotions, as well as of invalidation-based emotions. We will focus on full-blown anticipation-based emotions and their cognitive and motivational components (although also briefly considering core affective states and their impact on cognitive processes).

The basic concern of decision-making theories is to ascertain how helpful or harmful anticipatory emotions can be for making good decisions. By contrast, we do not make "cognitive" coincide with "rational", in that we consider emotions as already implying cognitive elements such as beliefs and goals.

**Expectancy and emotion** Maria Miceli,Cristiano Castelfranchi,2014-11-27 The mind is a powerful anticipatory device It frequently makes predictions about the future telling us not only how the world might or will be but also how it should be or better how we would like it to be These expectancies shape our lives they impact on our actual outcomes often acting as self fulfilling prophecies They also constitute a reference point for establishing whether an outcome is a loss or a gain that is we evaluate our own outcomes not in absolute terms but against our expectancies And we feel ill treated and betrayed when our expectancies are disappointed This book explores anticipation based emotions that is the emotions associated with the dialectical interaction between what is and what is not yet be it a mere wished for possibility or an expectation proper It offers an analysis of both the emotions implying anticipations of future events such as fear anxiety hope and trust and those elicited by the disconfirmation of a previous anticipation surprise disappointment discouragement sense of injustice regret and relief in terms of their belief and goal components In addition it addresses anticipated emotions that is emotions we think we might experience in future circumstances and explores how they influence our decisions The reader will be taken on a journey of exploration and discovery into the multifarious facets and implications of an important family of emotions aimed at understanding what they have in common as well as the distinguishing features of each distinct emotion and predicting their motivational and behavioral consequences For students and researchers interested in the affective sciences including psychology philosophy and neuroscience this is a highly original and thought provoking new work

**A History of Emotion in Western Music** Michael Spitzer, 2020-09-14 When asked to describe what music means to them most people talk about its power to express or elicit emotions As a melody can produce a tear tingle the spine or energize athletes music has a deep impact on how we experience and encounter the world Because of the elusiveness of these musical emotions however little has been written about how music creates emotions and how musical emotion has changed its meaning for listeners across the last millennium In this sweeping landmark study author Michael Spitzer provides the first history of musical emotion in the Western world from Gregorian chant to Beyonc Combining intellectual history music studies philosophy and cognitive psychology A History of Emotion in Western Music introduces current approaches to the study of emotion and formulates an original theory of how musical emotion works Diverging from psychological approaches that center listeners self reports or artificial experiments Spitzer argues that musical emotions can be uncovered in the techniques and materials of composers and performers Together with its extensive chronicle of the historical evolution of musical style and emotion this book offers a rich union of theory and history
