Cultural Psychology Robyn M. Holmes, 2020-01-30 Cultural Psychology draws upon major psychological topics, theories, and principles to illustrate the importance of culture in psychological inquiry. Exploring how culture broadly connects to psychological processing across diverse cultural communities and settings, it highlights the applied nature of cultural psychology to everyday life events and situations, presenting culture as a complex layer in which individuals acquire skills, values, and abilities. Two central positions guide this textbook: one that culture is a mental and physical construct that individuals live, experience, share, perform, and learn, and the second that culture shapes growth and development. Culture-specific and cross-cultural examples highlight connections between culture and psychological phenomena. The text is multidisciplinary, highlighting different perspectives that also study how culture shapes human phenomena. Topics include an introduction to cultural psychology, the history of cultural psychology, cultural evolution and cultural ecology, methods, language and nonverbal communication, cognition and perception. Through coverage of social behaviour, the book challenges students to explore the self, identity and personality, social relationships, social attitudes, and intergroup contact in a global world, and social influence, aggression, violence, and war. Sections addressing growth and development include human development and its processes, transitions and rituals across the lifespan, and socializing agents, socialization practices, and child activities. Additionally, the book features discussions of emotion and motivation, mental health, and psychopathology, and future directions for cultural psychology. Chapters contain teaching and learning tools, including case studies, multidisciplinary contributions, thought-provoking questions, class and experiential activities, chapter summaries, and additional print and media resources.

Diversity in Unity: Perspectives from Psychology and Behavioral Sciences Amarina Ashar Ariyanto, Hamdi Muluk, Peter Newcombe, Fred P. Piercy, Elizabeth Kristi Poerwandari, Sri Hartati R. Suradijono, 2017-10-31 The book highlights both the challenges and opportunities in the field of psychology and behavioral sciences with an emphasis on identifying practical implications for professionals, educators, and administrators and researchers in Asia and Pacific regions. Societies in the said regions have experienced massive changes to their social system, changes that are endured by societies worldwide such as those related to globalization, new technologies, and new norms regarding respect for individual diversity and well-being. Although the changes offer a wealth of new opportunities, they also act as potential sources of tension and apprehension. The book discusses the state-of-the-art topics on critical issues in various sub-fields of psychology and the behavioral sciences such as Clinical Psychology, Child Developmental Psychology, Industrial/Organizational Psychology, Experimental Psychology, Social Psychology, and Educational Psychology.
