### **Fountain House Creating Community In Mental Health Practice:**

Fountain House Alan Doyle, Julius Lanoil, Kenneth Dudek, 2013-11-12 Often people with mental illness feel alone in society with no place to go and little hope. Their isolation can be further perpetuated through typical approaches to treatment such as case management and psychotherapy. Since 1948 the Fountain House working community has worked to address the isolation and social stigmatization faced by people with mental illness. This volume describes in detail its evidence-based, cost-effective and replicable model which produces substantive outcomes in employment, schooling, housing and general wellness. Through an emphasis on personal choice, professional and patient collaboration and most important, the need to be needed, Fountain House demonstrates that people with serious mental illness can not only live but also contribute and thrive in society. The authors also explore the evolution of Fountain House practice which is grounded in social work and psychiatry and informs current strength-based and recovery methodologies. Its inherent humanity, social inclusivity, message of personal empowerment and innovation, a unique approach on behalf of people suffering from mental illness, have led to the paradigm's worldwide adoption.

**Design for Mental and Behavioral Health** Mardelle McCuskey Shepley, Samira Pasha, 2017-05-18 Studies confirm that the physical environment influences health outcomes, emotional state, preference, satisfaction and orientation, but very little research has focused on mental and behavioural health settings. This book summarizes design principles and design research for individuals who are intending to design new mental and behavioural health facilities and those wishing to evaluate the quality of their existing facilities. The authors discuss mental and behavioural health systems, design guidelines, design research and existing standards and provide examples of best practice. As behavioural and mental health populations vary in their needs, the primary focus is limited to environments that support acute care, outpatient and emergency care, residential care, veterans, pediatric patients and the treatment of chemical dependency.

The Palgrave Handbook of Mental Health Practice in Sub-Saharan Africa Kate E. Murray, Robert D. Schweitzer, Ashraf Kagee, Lily Kpobi, 2025-04-03 The focus of this handbook is to highlight the key issues in addressing the challenges and opportunities to promote mental health in Sub-Saharan Africa. A unique feature of this work is the privileging of African voices in expressing the strengths, vulnerabilities and unique approaches which have been found within the Sub-Saharan context. The handbook is broken into three sections. The first introduces the handbook and the general issues and concepts discussed. The second describes diverse community outreach and mental health interventions applied by the contributors in diverse Sub-Saharan Africa countries and contexts and addressing a range of mental health topics. The third focuses on systemic issues that affect mental health service delivery with recommendations provided. Opportunities for creating new models for sharing practices and disseminating knowledge generated by Sub-Saharan African practitioners for their culture and contexts are discussed.

Lives Interrupted Secil Arac-Orhun, Michael O'Loughlin, Montana Queler, 2019-07-12 *Lives Interrupted: Psychiatric Narratives of Struggle and Resilience* provides insight into the everyday experiences of individuals struggling with severe

psychic distress during a six month immersion program at the Fountain House headquarters a New York based organization that works to address the effects of serious mental illness These narratives add complexity and objectivity to the expanding discussion of psychiatric treatment plans Contributors to this collection argue that narratives are vital to treatment and should not be treated as secondary options to standard diagnosis and treatment practices that rely heavily on pharmaceuticals and often result in short term revolving door interventions for complex forms of human suffering

**Situating Phenomenological Psychopathology: Subjective Experience Within the World** Elizabeth Pienkos, Jasper Feytaerts, Rosa Ritunnano, Jérôme Englebert, Louis Sass, 2023-09-28 vThe discipline of phenomenological psychopathology has historically focused on elucidating the ways in which persons with psychiatric illnesses experience themselves and the world Early pioneers in this field were aware of the impact of uncontrollable life events on the onset and course of severe illness such as Jaspers recognition that environmental events may stimulate or enhance certain innate potentialities for the development of a disorder Furthermore the role of environment and life events in the development and onset of psychiatric illness has been well documented For example there is a clear relationship between the development of psychotic symptoms and life stressors including adverse childhood events urban living and migration However relatively little attention with some notable exceptions has been devoted to exploring the features of those experienced worlds and how they may impact the trajectory of severe illnesses such as schizophrenia depression and personality disorders
