, 2021-01-11 This book presents an international perspective of the influence of cultural issues on STEM reform Effective STEM education is of considerable importance internationally because there is increase pressure by governments to produce technically skilled people from the compulsory education sectors people capable of participating actively in the so called knowledge economy or knowledge society An important and distinguishing feature of the book is that it draws upon the empirical experiences and research of the local experts from an extremely diverse cohort across the world Contributors are Nayif Awad David Barlex Alexandra Bazdar Saouma BouJaoude Heba EL Deghaidy Marwa Eltanahy Sibel Erduran Sufian Forawi Clare Gartland Lilia Halim Ying Shao Hsu Zanaton Haji Iksan Deena Khalil Meredith Kier Nasser Mansour Mohamad Sattar Rasul Seema Rivera Dalene Swanson Paige Teamey Tuan Mastura Tuan Soh Russell Tytler No l Williams and Yi Fen Yeh **Equity in STEM Education Research** Alberto J. Rodriguez, Regina L. Suriel, 2022-09-06 This book focuses on the creative and transformative work of scholars who are advancing social justice through science STEM education with limited resources It draws attention to the significant body of work being conducted in various contexts so that readers could reflect and appreciate how much broader and transformative our impact could be if funding agencies policy makers and other researchers would widen their perspective and seek to promote social justice driven scholarship Public funding for STEM research on K 12 and teacher education that targets special populations is often limited and tends to favor mainstream research This book contains case studies on innovative and promising STEM research with a focus on equity diversity and social justice that are funded with limited or no public funding It also presents anecdotes from authors in relation to their struggles in either securing funding for their reported study or seeking to publish its findings This provides more context to the challenges of conducting non mainstream research in science STEM education Most of the contributors are scholars of color and or women conducting research with traditionally marginalized populations in science STEM Thus this book offers an additional venue to share the voices of marginalized scholars and allies seeking to broaden our understanding of the challenges and successes of promoting equity diversity and social justice in various educational contexts **Curriculum Connections Through the Library** Barbara K. Stripling, Sandra Hughes-Hassell, 2003-10-30 A collection of essays which explore the educational principles and research and connects national curriculum trends to current library practice

Becoming Scientists Rusty Bresser, Sharon Fargason, 2023-10-10 Most important to being a good science teacher is

holding the expectation that all students can be scientists and think critically Providing a thinking curriculum is especially important for those children in diverse classrooms who have been underserved by our educational system Becoming Scientists Good science starts with a question perhaps from the teacher at the start of a science unit or from the children as they wonder what makes a toy car move how food decomposes or why leaves change color Using inquiry science children discover answers to their questions in the same way that scientists do they design experiments make predictions observe and describe offer and test explanations and share their conjectures with others In essence they construct their own understanding of how the world works through experimentation reflection and discussion Look into real classrooms where teachers practice inquiry science and engage students in the science and engineering practices outlined in the Next Generation Science Standards Rusty Bresser and Sharon Fargason show teachers how to do the following Build on students varied experiences background knowledge and readiness Respond to the needs of students with varying levels of English language proficiency Manage a diverse classroom during inquiry science exploration Facilitate science discussions Deepen their own science content knowledge As the authors state Inquiry science has little to do with textbooks and lectures and everything to do with our inherent need as a species to learn about and reflect on the world around us Join your students on a journey of discovery as you explore your world via inquiry
