Transforming Modern Macroeconomics Roger E. Backhouse, Mauro Boianovsky, 2012-11-12 This book tells the story of the search for disequilibrium micro foundations for macroeconomic theory from the disequilibrium theories of Patinkin Clower and Leijonhufvud to recent dynamic stochastic general equilibrium models with imperfect competition Placing this search against the background of wider developments in macroeconomics the authors contend that this was never a single research program but involved economists with very different aims who developed the basic ideas about quantity constraints spillover effects and coordination failures in different ways The authors contrast this with the equilibrium market clearing approach of Phelps and Lucas arguing that equilibrium theories simply assumed away the problems that had motivated the disequilibrium literature Although market clearing models came to dominate macroeconomics disequilibrium theories never went away and continue to exert an important influence on the subject Although this book focuses on one strand in modern macroeconomics it is crucial to understanding the origins of modern macroeconomic theory The Foundations of Modern Austrian Economics Institute for Humane Studies, 1976 Proceedings of a conference sponsored by the Institute for Humane Studies and held at Royalton College South Royalton Vt in June 1974 Includes index Bibliography p 224 227 *Dynamic Macroeconomics* George Alogoskoufis, 2019-12-17 An advanced treatment of modern macroeconomics presented through a sequence of dynamic equilibrium models with discussion of the implications for monetary and fiscal policy This textbook offers an advanced treatment of modern macroeconomics presented through a sequence of dynamic general equilibrium models based on intertemporal optimization on the part of economic agents The book treats macroeconomics as applied and policy oriented general equilibrium analysis examining a number of models each of which is suitable for investigating specific issues but may be unsuitable for others After presenting a brief survey of the evolution of macroeconomics and the key facts about long run economic growth and aggregate fluctuations the book introduces the main elements of the intertemporal approach through a series of two period competitive general equilibrium models the simplest possible intertemporal models This sets the stage for the remainder of the book which presents models of economic growth aggregate fluctuations and monetary and fiscal policy The text focuses on a full analysis of a limited number of key intertemporal models which are stripped down to essentials so that students can focus on the dynamic properties of the models Exercises encourage students to try their hands at solving versions of the dynamic models that define modern macroeconomics Appendixes review the main mathematical techniques needed to analyze optimizing dynamic macroeconomic models The book is suitable for advanced undergraduate and graduate students who have some knowledge of economic theory and mathematics for economists

Modern Financial Macroeconomics Todd A. Knoop, 2008-04-07 Modern Financial Macroeconomics takes a non technical approach in examining the role that financial markets and institutions play in shaping outcomes in the modern macro economy Reviews historical and contemporary macroeconomic theory Examines governmental influence on moderating or exacerbating economic fluctuations Discusses both empirical and theoretical links between financial systems and economic performance as well as case studies detailing the role of finance in specific business cycle episodes

Alternative Approaches in Macroeconomics Philip Arestis, 2018-02-07 This book honours Professor John McCombie's retirement by exploring a variety of themes theories and debates in non orthodox macroeconomics With contributions from leading scholars the book covers diverse ground in economic thought policy empirical work and modelling It demonstrates ongoing presumptions and asks probing questions of topical questions from the increase of income equality to the international variation of productivity investment This collection will appeal to academics and students with an interest in the history of macroeconomic thinking

C.F.A. Study Guide Institute of Chartered Financial Analysts, 1992 **Advanced Modern Macroeconomics** Max Gillman, 2011 Modern Macroeconomics by Max Gillman takes a new and modern approach to macroeconomic theory using microeconomic foundations Building from the standard neo classical models Gillman has developed a new dynamic model which works to explain business cycles and unemployment why you can have a banking lead recession as well as fiscal and monetary policy Although strong in mathematical rigour all calculations in this text are fully derived and graphs provide a direct representation making it accessible This text is suitable for undergraduate students studying Advanced Macroeconomics courses

Evolutionary Macroeconomics John Foster, 1987 *Foundations of Modern Econometrics* Ragnar Frisch, 1995 These two volumes convey the writings of Ragnar Frisch 1895 1973 who together with Jan Tinbergen was the first winner of the Nobel Prize in economics He played a major role in the foundation of econometrics as a discipline partly through his position as editor of *Econometrica*
