Ensure children of all backgrounds can thrive with an intercultural approach to early childhood education. In a multicultural society such as Canada's early childhood educators work with children and families from a diverse mix of ethnicities religions languages abilities and lifestyles. Diversity enriches the experience of children and educators alike in these environments but it can also present challenges in supporting each child's growth and learning. In **Introduction to Early Childhood Learning and Care** early learning specialists Carole Massing and Mary Lynne Matheson present an intercultural perspective as a foundation of equitable outcomes in early childhood education but just what does that look like? An intercultural approach involves the respectful exchange of ideas between people from diverse backgrounds leading to mutual trust and deeper relationships. Guided by a diverse team of reviewers this book examines the concepts approaches and strategies that every early childhood educator needs to know to provide sensitive culturally responsive care for children and their families. Topics include The theoretical bases for an intercultural approach to early childhood education and care. The factors that impact a child's physical cognitive social and emotional development. How to create environments that enhance children's wellbeing and affirm their identity. How to support children's creativity literacy and inquiry skills through an intercultural lens. The skills responsibilities and challenges of working as an early childhood educator. **Strong Foundations** Unesco, 2006. This report the fifth in the series examines the progress towards achieving the six Education for All EFA goals set at the World Education Forum in Dakar in 2000 focusing on the provision of comprehensive early childhood care and education particularly for the most disadvantaged children. Programmes that support young children during the years before they go to primary school encompassing care health and nutrition issues as well as education are crucial to

establishing strong foundations for subsequent learning and development The report finds that demand for early education and care is expanding rapidly spurred on by higher numbers of women in the labour market and more single parent households However young children in greatest need who also stand to benefit the most are unlikely to have access to early years programmes with coverage remaining very low in most developing countries Participation in pre school services ranges from 62 per cent in Latin America and the Caribbean to 35 per cent in developing countries of East Asia and the Pacific 32 per cent in South and West Asia 16 per cent in the Arab States and 12 per cent in Sub Saharan Africa In comparison pre school provision is almost universal in most Western European countries and although enrolments fell sharply in transition countries following the break up of the Soviet Union they are now recovering Although there has been considerable progress made in other aspects of the EFA goals particularly in relation to universal primary education more girls attending schools and an increase in international aid for education the report highlights the major challenges that remain if the six EFA goals are to be met by 2015
